Technical editor: P. TEL, North-Holland Publishing Company, P.O. Box 103, 1000 AC, Amsterdam, The Netherlands – TELEX 18582

SUBSCRIPTION DATA. All prices are **inclusive** of postage and handling. The Dutch Guilder price is definitive; the currency equivalent is for your guidance only.

PHYSICA A: The subscription price per volume of about 640 pages is Dfl. 225.00 ($90.00). For 1982 6 volumes PHYSICA A are announced at a total price of Dfl. 1350.00 ($540.00). PHYSICA A is published monthly.
PHYSICA B + C: The subscription price per volume of about 432 two-column pages is Dfl. 225.00 ($90.00). For 1982 6 volumes PHYSICA B + C are announced at a total price of Dfl. 1350.00 ($540.00). PHYSICA B + C is published monthly.
PHYSICA D: The subscription price per volume of about 432 two-column pages is Dfl. 225.00 ($90.00). For 1982 3 volumes PHYSICA D are announced at a total price of Dfl. 675.00 ($270.00). PHYSICA D is published bimonthly.
PHYSICA A, PHYSICA B + C and PHYSICA D: The total price of a combined subscription (15 volumes in all) is Dfl. 3065.00 ($1226.00). The subscription price per volume is Dfl. 204.50 ($81.75).
Subscriptions should be sent to the publishers, NORTH-HOLLAND PUBLISHING COMPANY, P.O. BOX 211, 1000 AE Amsterdam, The Netherlands, or to any subscription agent.
Claims for missing numbers should be made within three months of their publication. The publishers only expect to supply missing numbers free when losses have been sustained in transit and when stocks permit.

North-Holland Publishing Company (1982): All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior permission of the publisher, North-Holland Publishing Company, P.O. Box 103, 1000 AC Amsterdam, The Netherlands.
Submission of an article for publication implies the transfer of the copyright from the author(s) to the publisher and entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.
Special regulations for readers in the U.S.A. – This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. (N.B. For review journals this fee is $0.25 per copy per page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, of for creating new collective works. Special written permission must be obtained from the publisher for such copying.
Special regulations for authors in the U.S.A. – Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the U.S. Copyright Law.

ANALYTIC SUBJECT INDEX

Absorption (see *Crystalline slab with complex polarisability*) **107A** (1981) 471

Absorption coefficient for multiply periodic systems (see *Stochastic electrodynamics*) **109A** (1981) 178

A15-compounds (see *Electron–phonon system*) **102A** (1980) 22

A15-compounds

– Multiple band electron–phonon transport theory. II. Derivation of transport equation-Kragler **102A** (1980) 201

Acoustic-relaxational mode coupling (see *Band Jahn–Teller systems*) **110A** (1982) 373

Acoustic waves, linear transversal

– On the propagation of linear transverse acoustic waves in isotropic media with mechanical relaxation phenomena due to viscosity and a tensorial internal variable. I. General formalism - Kluitenberg **110A** (1982) 361

Affine geometry

– Weyl's association, Wigner's function and — - Balazs **102A** (1980) 236

Aharonov–Bohm effect

– Path integrals with topological constraints: — and polymer entanglements - Wiegel **109A** (1981) 609

Anharmonic oscillator (see *Wigner function, smoothed*) **109A** (1981) 193

Air (see *Thermal conductivity*) **103A** (1980) 521

Aluminum (see *Model-potential theory*) **105A** (1981) 607

Ammonia

– The Senftleben–Beenakker effect in — and its mixtures with noble gases - Thijsse et al. **102A** (1980) 305

Ammonia (see NH_3) **103A** (1980) 379

Ammonia–noble gas mixtures

– The Senftleben–Beenakker effect in ammonia and its mixtures with noble gases - Thijsse et al. **102A** (1980) 305

Anderson model, periodic

– Specific heat for the periodic Anderson model - Zieliński and Matlak **110A** (1982) 624

Angular-momentum operators (see *Boltzmann equations, classical and quantum-mechanical*) **108A** (1981) 265

Angular pair correlation function (see *Quadrupolar fluids*) **110A** (1982) 235

Anisotropic cubic systems

– Critical behavior of — with long- and short-range interactions - Yamazaki and Holz **109A** (1981) 568

– Crossover behavior of — with ionic anisotropy - Ueno et al. **109A** (1981) 579

Anisotropic Heisenberg exchange

– A new method for calculation of the magnetic properties in one- and two-dimensional spin systems with — - Tanaka and Uryû **105A** (1981) 493

Anisotropic Heisenberg ferromagnet (see *Green's functions, standard basis operator*) **108A** (1981) 180

A15-structure
– On the dynamics of band Jahn–Teller systems with — - Kragler **110A** (1982) 373
Antiferromagnetic lattices
– Ground-state energies of — - Van den Broek et al. **104A** (1980) 298
Antiferromagnetic transition (see *Cerium monochalcogenides*) **109A** (1981) 339
Antiferromagnet, isotropic and anisotropic (see *Ising antiferromagnet, triangular*) **108A** (1981) 531
Antiferrorotational transition (see *Methane, solid*) **109A** (1981) 339
Approach to equilibrium (see *Two-level system interacting with EM field*) **108A** (1981) 305
Argon equation of state (see *One-fluid theory*) **109A** (1981) 265
Atomic charge distribution (see *Xenon fluorides*) **101A** (1980) 22
Atomic correlation functions (see *Dicke model*) **103A** (1980) 213
Attenuation (see *Acoustic waves, linear transversal*) **110A** (1982) 361
Attenuation (see *Depolarization of light*) **103A** (1980) 455
Autocatalytic system
– Note on the stochastic theory of a self-catalytic chemical reaction - Dambrine and Moreau **106A** (1981) 559
Autocorrelation function (see *Enskog theory*) **110A** (1982) 329
Autocorrelation functions (see *Dielectric loss*) **108A** (1981) 135

Balance of linear momentum (see *Stress tensor, asymmetric*) **105A** (1981) 169
Balescu–Lenard equation (see *Test particle problems*) **105A** (1981) 380
Band Jahn–Teller systems
– On the dynamics of — with A15-structure - Kragler **110A** (1982) 373
Band spectrum (see *Harmonic oscillator, linearly damped*) **103A** (1980) 371
BBGKY equations
– On the solutions of the equilibrium — - Moraal **105A** (1981) 297
BCS model
– On coexistence of superconductivity and ferromagnetism - Bogolubov Jr. et al. **101A** (1980) 613
Bernoulli dynamical systems
– On the equivalence between — and stochastic Markov processes - Courbage and Misra **104A** (1980) 359
Bernouilli systems
– On converse to Koopman's Lemma - Goodrich and Gustafson **102A** (1980) 379
Bethe approximation (see *Random bond Ising model*) **107A** (1981) 360
Bethe–Salpeter equation (see *Radiation transfer theory*) **106A** (1981) 398
Bethe–Salpeter equations (see *Quantum field theory of crystals*) **110A** (1982) 270
Bethe–Salpeter equations (see *Quantum field theory of crystals*) **110A** (1982) 282

Binary mixture (see *One-fluid theory*) **109A** (1981) 265
Binary mixtures (see *Efimov effect*) **108A** (1981) 77
Birth and death formalism (see *Chemical reaction*) **102A** (1980) 389
Birth and death theory (see *Autocatalytic system*) **106A** (1981) 559
Bloch electrons (see *Electron transport theory*) **110A** (1982) 471

Bloch electrons in uniform fields
– Wigner representation of — - Jannussis et al. **107A** (1981) 587
Bogoliubov transformation
– Canonical forms for quadratic Hamiltonians - Broadbridge and Hurst **108A** (1981) 39
Bohr–Sommerfeld conditions (see *Pure state condition*) **110A** (1982) 501
Boltzmann equation (see *Heavy ions in light gases*) **101A** (1980) 491
Boltzmann equation (see *Lyapunov functionals*) **109A** (1981) 328
Boltzmann equation for BGK collision model (see *Kramers equation*) **110A** (1982) 106
Boltzmann equations, classical and quantum-mechanical
– Correspondence between classical and quantum-mechanical Boltzmann equations - Kuščer et al. **108A** (1981) 265
Boltzmann equations for internal state
– Soluble — and Maxwell models - Hendriks et al. **101A** (1980) 375
Boltzmann equations, soluble
– Soluble Boltzmann equations for internal state and Maxwell models - Futcher et al. **101A** (1980) 185
Boltzmann gas, charged
– Macroscopic behaviour of a charged Boltzmann gas - Bányai et al. **107A** (1981) 166
Boltzmann statistics (see *Confinement electron gas*) **107A** (1981) 598
Boltzmann-theory, relativistic
– Relativistic Boltzmann-theory for a plasma. V. Reduction of the collision integrals - Van Erkelens and Van Leeuwen **101A** (1980) 205
Boltzmann theory, relativistic
– Relativistic Boltzmann theory for a plasma. VI. The relativistic Landau equation - Van Erkelens **107A** (1981) 48
Bond and site model, annealed and quenched (see *n-vector model*) **107A** (1981) 255
Boolean algebra of species observables
– Quantum logics and chemical kinetics - Ivanov **107A** (1981) 341
Born–Oppenheimer model of gas mixture (see *Efimov effect*) **108A** (1981) 77
Bose condensation (see *Heterophase system*) **110A** (1982) 247
Bose–Einstein condensation (see *Rescaled occupation number representation*) **104A** (1980) 189
Boson gas, free
– On generalized condensation in the boson gas - Van den Berg and Lewis **110A** (1982) 550
Bosons (see *Pressure inequalities in quantum statistics*) **106A** (1981) 603
Bosons, one-dimensional impenetrable
– Correlation functions for n species of one-dimensional impenetrable bosons - Ottinger **107A** (1981) 423
Boundary conditions (see *Ionic systems*) **107A** (1981) 179
Boundary conditions (see *Fluids with spin*) **107A** (1981) 280
Boundary conditions for polyatomic gases
– Thermodynamical theory of — - Halbritter and Waldmann **104A** (1980) 1
Bound state of two excitons (see *Soliton transformation*) **110A** (1982) 580
Bound states
– Quantum kinetic equations in systems with — - Klimontovich and Kremp **109A** (1981) 517
Bound states for nondegenerate quantum systems
– Bound states and equations of state for nondegenerate quantum systems with short-range interactions - Gau et al. **109A** (1981) 531
Brillouin lines (see *Light scattering from a fluid*) **107A** (1981) 491

Brownian harmonic oscillator
– Brownian motion and quasi-Markov processes - Marshall **103A** (1980) 172
Brownian motion (see *Brownian harmonic oscillator*) **103A** (1980) 172
Brownian motion (see *Colloidal suspensions*) **103A** (1980) 325
Brownian motion (see *Markov processes, quasi*) **104A** (1980) 223
Brownian motion (see *Duffing nonlinear oscillator*) **104A** (1980) 495
Brownian motion in Oseen's approximation
– Stochastic processes with nonlinear dissipation: — - Hermans **109A** (1981) 293
Brownian motion of a drop (see *Viscous drop, almost spherical*) **101A** (1980) 423
Brownian motion of an oscillator
– Stationary solution of the Fokker–Planck equation for the — in an external force - Morita **110A** (1982) 321
Brownian motion of a pendulum
– Eigenvalues and eigenfunctions of the Kramers equation. Application to the — - Vollmer and Risken **110A** (1982) 106
Brownian motion of charged carriers
– Brownian motion in a quantizing magnetic field - Das **110A** (1982) 489
Brownian motion of harmonic systems
– — with fluctuating parameters. I. Exact first and second order statistics of a mechanical oscillator - West et al. **102A** (1980) 470
Brownian motion of harmonic systems
– — with fluctuating parameters. III. Scaling and moment instabilities - Lindenberg et al. **105A** (1981) 445
Brownian motion of n spheres
– On the motion and — in a viscous fluid - Mazur **110A** (1982) 128
Brownian motion, rotational (see *Rotational diffusion*) **110A** (1982) 171
Brownian motion, two-dimensional
– A generalized Oseen theory of two-dimensional Brownian motion - Varley **108A** (1981) 417
Brownian particle
– A hyperbolic "Diffusion equation" taking a finite collision frequency into account - De Jagher **101A** (1980) 629
Brownian particle in a plasma
– Dynamics of a — in the long-time limit - Dickman and Varley **105A** (1981) 337
Brownian particles, interacting
– Wave vector and frequency dependent longitudinal viscosity of systems on interacting Brownian particles - Hess **107A** (1981) 190
Brownian particles, nonspherical
– Nonspherical —. Kinetic description and application to flow birefringence - Kagermann et al. **105A** (1981) 271
Brownian particles, strongly interacting
– Dynamical properties of strongly interacting Brownian particles. I. Dynamic shear viscosity - Ohtsuki **108A** (1981) 441
Brownian particles, strongly interacting
– Dynamical properties of strongly interacting Brownian particles. II. Self-diffusion - Ohtsuki **110A** (1982) 606
Burnett equations (see *Diffusion equations in the Burnett regime*) **106A** (1981) 539
Burnett experiment
– Experimental error of the — - Kell **105A** (1981) 536

Cactus tree (see *Ising model (random) on the cactus tree*) **105A** (1981) 620
Canonical transformations (see *Classical dynamics for particles with spin*) **101A** (1980) 571
Canonical transformations (see *Weyl images*) **109A** (1981) 317
Canonical transformations of macrovariables (see *Fluctuation–dissipation relations, nonlinear*) **106A** (1981) 480
Cantor sets (see *Random processes*) **109A** (1981) 597
Capillary length (see *Fluid–fluid interface*) **107A** (1981) 91
Carbon dioxide (see *Critical region of fluids*) **103A** (1980) 455
Cathodoluminescence
– Superstatistical emission noise - Van Vliet et al. **108A** (1981) 511
Cayley tree (see *Random Ising model on the Cayley tree*) **103A** (1980) 354
Cayley trees (see *Z(M) models*) **105A** (1981) 472
Cerium monochalcogenides
– The ordering phase transitions in solid methane and the — compared. A test of universality - Sprik et al. **109A** (1981) 339
Chains, long persistent (see *Liquid–crystalline transition*) **108A** (1981) 546
Channeled particles (see *Thermalization of beams of charged particles*) **109A** (1981) 305
Channeling of ions
– Stochastic processes in channeling - Gavrilenko and Fedyanin **105A** (1981) 229
Chapman–Cowling approximation (see *Plasmas, hot dilute*) **110A** (1982) 81
Chapman–Cowling theory (see *Thermal diffusion factors*) **108A** (1981) 488
Chapman–Enskog theory (see *Multivariate master equation*) **101A** (1980) 167
Charge density and currents (see *Interfacial electromagnetic properties*) **102A** (1980) 105
Charged gas (see *Boltzmann gas, charged*) **107A** (1981) 166
CH_3CN-Ar mixture
– The thermal conductivity of the gaseous mixture CH_3CN–Ar in a magnetic field - Thijsse et al. **102A** (1980) 298
CH_3CN, liquid (see *Polar liquids*) **110A** (1982) 408
Chemical equilibria
– Statistical mechanical model with chemical reaction - Høye and Olaussen **104A** (1980) 435
Chemical kinetics
– Quantum logics and — - Ivanov **107A** (1981) 341
Chemical reaction
– Note on the reaction rate in non-ideal mixtures - Moreau **102A** (1980) 389
Chemical spinodal
– Two particle cluster calculation of the — - Van der Haegen et al. **107A** (1981) 622
Chemical systems, bi-stable
– Transition time statistics in simple bi-state chemical systems - Gillespie **101A** (1980) 535
Chemical systems, sensitivity of
– Sensitivity of nonequilibrium systems - Kondepudi and Prigogine **107A** (1981) 1
C_5H_5N into benzene (see *Polar liquids*) **110A** (1982) 408
C_5H_5N, liquid (see *Polar liquids*) **110A** (1982) 408
Classical continuous systems
– On the solutions of the correlation equations for — - Zagrebnov **109A** (1981) 403
Classical dynamics for particles with spin
– On the Hamiltonian and Lagrangian formulation of — - Ruijgrok and Van der Vlist **101A** (1980) 571
Classical relativistic equations (see *Particle with spin in external field*) **104A** (1980) 281

Closed time path Green's functions
– — and nonlinear response theory - Hao **109A** (1981) 221
Cluster coefficient
– Efimov effect and the third — of binary mixtures - Hoogeveen and Tjon **108A** (1981) 77
Cluster expansion for fluids
– — with long-range interactions - Meister and Felderhof **102A** (1980) 145
Cluster Ising models
– Exact solutions of the Curie–Weiss, Oguchi, and other — - Bowers **108A** (1981) 473
Cluster-variation method
– Convergence of the — for a system on a triangular lattice - Kevin McCoy et al. **109A** (1981) 445
Cluster variation method (see *Random bond Ising model*) **107A** (1981) 360
Coexistence curve (see *Transformation theory in thermodynamics*) **104A** (1980) 181
Coexistence surface (see *Neon–xenon system*) **103A** (1980) 183
Coil–globule transition (see *Polymer chain collapse*) **105A** (1981) 357
Collective atomic system
– Exact thermodynamic behaviour of a — in an external field - Puri and Lawande **101A** (1980) 599
Collinear metamagnetism
– Theory of —. I. Unified treatment of field- and temperature-induced metamagnets - Onyszkiewicz **103A** (1980) 226
– Theory of —. II. High density expansion method - Onyszkiewicz **103A** (1980) 257
– Theory of —. III. Magnons spectrum by renormalized high density expansion - Onyszkiewicz **103A** (1980) 274
Collision induced phenomena (see *Relative motions in atomic fluids*) **102A** (1980) 70
Collision integrals
– Theory of the Senftleben–Beenakker effects for NH_3 and ND_3: — - Snider et al. **103A** (1980) 379
Collision integrals (see *Relativistic kinetic theory*) **101A** (1980) 205
Collisional line broadening (see Raman lines, rotational) **104A** (1980) 509
Collisional line broadening (see *Rayleigh line, depolarized*) **104A** (1980) 548
Collisional line shift (see *Raman lines, rotational*) **104A** (1980) 509
Colloidal suspensions
– A model of Brownian dynamics for — - Braun **103A** (1980) 325
Colloidal systems
– Dynamical properties of —. III. Collective and self-diffusion of interacting charged particles - Hess and Klein **105A** (1981) 552
Complex permittivity
– Modified Rocard relation for — - McConnell **105A** (1981) 593
Composition dependence of viscosity (see *Neon–helium mixtures*) **106A** (1981) 415
Compressible fluid (see *Viscous drop, almost spherical*) **101A** (1980) 407
Condensation, generalized
– On generalized condensation in the boson gas - Van den Berg and Lewis **110A** (1982) 550
Conductance theory, quantum-statistical
– Quantum-statistical conductance theory of nonideal plasmas by use of the force–force correlation function method - Röpke et al. **101A** (1980) 243
Conductivity (see *Ionic systems*) **107A** (1981) 179
Configurational transitions (see *Heterophase system*) **110A** (1982) 247

Confinement electron gas
– Statistical mechanics of a — in a uniform electromagnetic field - Vlachos and Jannussis **107A** (1981) 598
Conservation laws (see *Classical dynamics for particles with spin*) **101A** (1980) 571
Conserved densities
– Statistical dynamics of — for the hard-sphere Lorentz gas - Haus and Lücke ... **109A** (1981) 555
Constants of motion (see *Harmonic oscillator, damped time-dependent*) **103A** (1980) 35
Continuum Heisenberg spin system
– On a new formulation of the — in a space of arbitrary dimensionality - Ruijgrok and Jurkiewicz **103A** (1980) 573
Convergent kinetic equations (see *Plasmas, hot dilute*) **110A** (1982) 81
Cooperative two-photon resonance fluorescence
– — of a three-level atom - Mavroyannis and Sharma **102A** (1980) 431
Cooper coupling of electrons
– — in strong high-frequency fields - Seminozhenko and Yatsenko **105A** (1981) 86
Correlated critical states
– General properties of Gausson-conserving descriptions of quantal damped motion - Hernandez and Remaud **105A** (1981) 130
Correlated effective field approximation
– On two renormalised effective field theories - Fynbo **105A** (1981) 517
Correlation functions
– Hydrodynamics and molecular motion: a phenomenological approach - Evans and Grigolini **105A** (1981) 31
Correlation functions (see *Bosons, one-dimensional impenetrable*) **107A** (1981) 423
Correlation functions, low-frequency
– Low-frequency correlation functions in case of nonlinear dynamics of fluctuations - Morozov **110A** (1982) 201
Coulomb gas (see *Sine–Gordon model*) **103A** (1980) 597
Coulomb gas (see *Two-dimensional Coulomb gas*) **104A** (1980) 447
Coulomb gas, two-dimensional
– The two-dimensional Coulomb gas in the critical region - Høye and Olaussen ... **107A** (1981) 241
Coulomb logarithm (see *Boltzmann theory, relativistic*) **107A** (1981) 48
Coulomb systems, two-dimensional
– Statistical dynamics of two-dimensional Coulomb systems. I. Lattice sums and simulation methodology - Perram and De Leeuw **109A** (1981) 237
Coupled spin–phonon system (see *Hydrogen-bonded ferroelectrics*) **107A** (1981) 201
Coupling coefficients (see *Symmetry-adapted linear combinations for a finite group*) **106A** (1981) 521
Coupling constants between orientational and translational motion (see *Light scattering from fluids*) **107A** (1981) 404
Critical behaviour (see *Anisotropic cubic systems*) **109A** (1981) 568
Critical behaviour (see *Anisotropic cubic systems*) **109A** (1981) 579
Critical behaviour (see *Critical double point*) **103A** (1980) 316
Critical behaviour (see *Random bond Ising model*) **104A** (1980) 115
Critical behaviour (see *Vapour–liquid equilibria*) **101A** (1980) 459
Critical behaviour of dielectric constant
– Behavior of the dielectric constant of fluids near a critical point - Sengers et al. **104A** (1980) 573

Critical dynamics
– —. The expansion of the master equation including a critical point. I. Diffusion processes - Dekker **103A** (1980) 55
– —. The expansion of the master equation including a critical point. II. General Markov processes - Dekker **103A** (1980) 80
Critical double point (see also *Neon–xenon system*) **103A** (1980) 183
– Cross-over of exponent values near the — - Boots **103A** (1980) 316
Critical-exponent renormalization (see *Schofield's linear model*) **105A** (1981) 53
Critical exponents (see *Neon–xenon system*) **103A** (1980) 183
Critical exponents (see *Critical double point*) **103A** (1980) 316
Critical exponents (see *Ising model with vacancies*) **108A** (1981) 589
Critical exponents (see *Percolation problem*) **101A** (1980) 145
Critical exponents (see *Self-avoiding walks*) **104A** (1980) 427
Critical exponents (see *Spin 1 Ising model*) **109A** (1981) 352
Critical exponents (see *Spin 1/2 XY model*) **107A** (1981) 431
Critical exponents (see *Yvon–Born–Green equation in critical region*) **109A** (1981) 382
Critical fixed points
– — in discrete hydrodynamics - Visscher **108A** (1981) 153
Critical indexes (see *Ferromagnet with paramagnetic fluctuations*) **110A** (1982) 518
Critical isotherm (see *Transformation theory in thermodynamics*) **104A** (1980) 181
Critical line, derivatives along (see *One-fluid theory*) **109A** (1981) 265
Critical phenomena (see *Cluster Ising model*) **108A** (1981) 473
Critical point (see *Critical dynamics*) **103A** (1980) 55
Critical point (see *Critical dynamics*) **103A** (1980) 80
Critical point of phase separation
– Noncritical interface near a critical end point II - Ramos-Gómez and Widom **104A** (1980) 595
Critical point scaling
– — in the Percus–Yevick equation - Fishman and Fisher **108A** (1981) 1
Critical region (see *Coulomb gas, two-dimensional*) **107A** (1981) 241
Critical region of fluids
– Investigation of multiple scattering contributions to the depolarization of light scattered by xenon and carbon dioxide in the critical region - Trappeniers et al. **103A** (1980) 455
Critical temperature
– — of inhomogeneous mixtures of Ising and Heisenberg substances - Pekalski and Ausloos **101A** (1980) 507
Critical temperature
– — for random planar model with frustration - Longa (*Letter to the Editor*) **103A** (1980) 633
Critical temperature
– — for a system with Heisenberg-like nearest neighbour and Ising-like next nearest neighbour interactions-Komoda and Pękalski **108A** (1981) 164
Critical wall perturbation
– — and a local free energy functional - Fisher and Au-Yang **101A** (1980) 255
Crossed electric and magnetic fields (see *Electron gas, non-equilibrium*) **102A** (1980) 512
Crossover behaviour (see *Anisotropic cubic systems*) **109A** (1981) 579
Crossover exponents (see *Anisotropic cubic systems*) **109A** (1981) 568
Cross section for inelastic scattering (see *Fluctuation during spinodal decomposition*) **103A** (1980) 99

Cumulant expansion (see *Differential equations, inhomogeneous linear random*) . **109A** (1981) 23
Curie–Weiss Ising model
– Exact solutions of the Curie–Weiss, Oguchi, and other cluster Ising models - Bowers **108A** (1981) 473
Current density response (see *Electromagnetic response*) **108A** (1981) 575
Crystal films, thin (see *Radiative decay of Wannier excitons*) **102A** (1980) 131
Crystalline dielectric (see *Surface of crystalline dielectric*) **101A** (1980) 89
Crystalline slab with complex polarisability
– On the dielectric theory of a molecular — - Grindlay **107A** (1981) 471
Crystal phonons (see *Quantum field theory of crystals*) **110A** (1982) 257

D_2 (see *Hydrogen isotopes*) **104A** (1980) 509
D_2 (see *Hydrogen isotopes*) **104A** (1980) 548
Damped harmonic oscillator
– General properties of Gausson-conserving descriptions of quantal damped motion - Hernandez and Remaud **105A** (1981) 130
Damping (see *Harmonic oscillator, damped time-dependent*) **103A** (1980) 35
Damping theory for a laser model
– Correction to the laser master equation - Arimitsu **104A** (1980) 126
Debye–Hückel system (see *Colloidal systems*) **105A** (1981) 552
Decay processes
– Physical description of — - Henin and Mayné **108A** (1981) 281
Defects in hard core statistical ensembles
– Theory of — - Holz **109A** (1981) 58
Defect states theory (see *Planar rotator model*) **102A** (1980) 255
Deformation energy (see *Liquid drops, charged*) **101A** (1980) 223
De Haas–Van Alphen effect
– Fermi–Dirac statistics for free electrons in uniform electric and magnetic fields - Jannussis et al. **107A** (1981) 575
Delta-correlated cumulants
– Brownian motion of harmonic systems with fluctuating parameters. I. Exact first and second order statistics of a mechanical oscillator - West et al. **102A** (1980) 470
– Processes with — - Van Kampen **102A** (1980) 489
Demagnetizing effects (see *Schofield's linear model*) **105A** (1981) 53
Density–density correlation function (see *Light scattering from a fluid*) **107A** (1981) 491
Density–density plane
– On the shape of the coexistence curve and of the critical isotherm in a — - Mistura **104A** (1980) 181
Density dependence of viscosity (see *Neon–helium mixtures*) **106A** (1981) 415
Density distribution function (see *Hydrodynamics for an ideal fluid*) **107A** (1981) 109
Density fluctuations (see *Spatial correlation*) **107A** (1981) 437
Density-functional method (see *Electron–hole plasma, inhomogeneous*) **109A** (1981) 161
Density of states (see *Anderson model, periodic*) **110A** (1982) 624
Density of states (see *Edge dislocation*) **108A** (1981) 605
Density of states (see *Linear chain, disordered*) **102A** (1980) 370
Density of states, local (see *Point imperfection*) **103A** (1980) 205
Density of states within a band (see *Substitutional impurity cluster*) **108A** (1981) 613
Density operator, steady state
– Exact thermodynamic behaviour of a collective atomic system in an external

field - Puri and Lawande **101A** (1980) 599
Depolarization of light
– Investigation of multiple scattering contributions to the — scattered by xenon and carbon dioxide in the critical region - Trappeniers et al. **103A** (1980) 455
Depolarization of scattered light
– Investigation of multiple scattering contributions to the depolarization of light scattered by carbon dioxide and xenon in the critical region. I. Basic theoretical formulae and experimental data - Trappeniers et al. **101A** (1980) 431
Development of the universe (see *Grand unified theories*) **110A** (1982) 1
Diamagnetism of an electron gas
– — and surface currents - Jancovici **101A** (1980) 324
Dicke model
– Intensity fluctuations in a driven — - Hassan et al. **103A** (1980) 213
Dielectric constant (see *Liquid–vapour interface*) **101A** (1980) 99
Dielectric constant of a liquid
– Local field in liquid dielectrics: a two-parameter mean field approach - Bonneville **102A** (1980) 49
Dielectric constant of fluids
– Behavior of the — near a critical point - Sengers et al. **104A** (1980) 573
Dielectric function (see *Two-dimensional electron gas*) **103A** (1980) 621
Dielectric loss
– A theory of — in the aligned nematic mesophase - Ferrario and Evans **108A** (1981) 135
Dielectric of polar molecules (see *Complex permittivity*) **105A** (1981) 593
Dielectric properties
– Static — of Stockmayer fluids - Pollock and Alder **102A** (1980) 1
– Local field in liquid dielectrics: a two-parameter mean field approach - Bonneville **102A** (1980) 49
Dielectric properties
– Static — of polarizable Stockmayer fluids - Pollock et al. **108A** (1981) 14
Dielectric relaxation
– On vectorial internal variables and dielectric and magnetic relaxation phenomena - Kluitenberg **109A** (1981) 91
– On transformations of internal vectorial variables in the thermodynamic theory of — and the invariance of Onsager's reciprocal relations - Van Veenendaal and Kluitenberg **109A** (1981) 123
Dielectric response (see *Band Jahn–Teller systems*) **110A** (1982) 373
Dielectric response (see *Electron–phonon system*) **102A** (1980) 201
Dielectric response theory (see *Hopping model, for charged particles*) **103A** (1980) 119
Dielectrics with periodic boundary conditions
– Fluctuation theorems for — - Felderhof **101A** (1980) 275
Dielectric theory
– On the — of a molecular crystalline slab with complex polarisability - Grindlay **107A** (1981) 471
Differential equations, inhomogeneous linear random
– Inhomogeneous linear random differential equations with mutual correlations between multiplicative, additive and initial-value terms - Roerdink **109A** (1981) 23
Differential real space renormalization (see *Magnetic exponent of Ising model*) ... **106A** (1981) 589
Diffuse binary scattering (see *Boltzmann equations for internal state*) **101A** (1980) 375

Diffusion
– A hyperbolic "— equation" taking a finite collision frequency into account - De Jagher **101A** (1980) 629
Diffusion (see *Fokker–Planck equation, nonlinear*) **108A** (1981) 233
Diffusion (see *Hopping model*) **102A** (1980) 357
Diffusion (see *Multivariate master equation*) **101A** (1980) 167
Diffusion (see *Nonlinear kinetics*) **108A** (1981) 63
Diffusion (see *Reaction-diffusion systems*) **101A** (1980) 289
Diffusion coefficient (see *Oseen theory, generalized*) **108A** (1981) 417
Diffusion-conduction equation (see *Boltzmann gas, charged*) **107A** (1981) 166
Diffusion–conduction equation (see *Hopping model, for charged particles*) **103A** (1980) 119
Diffusion constant (see *Colloidal suspensions*) **103A** (1980) 325
Diffusion constant (see *Laser master equation*) **104A** (1980) 126
Diffusion constant (see *Velocity autocorrelations*) **103A** (1980) 558
Diffusion equation, canonical
– Spatial correlations in nonequilibrium systems: the effect of diffusion - Medina-Noyola and Keizer **107A** (1981) 437
Diffusion equation, generalized (see *Brownian motion of charged carriers*) **110A** (1982) 489
Diffusion equations in the Burnett regime
– Non-linear constitutive and — - Robles-Dominguez et al. **106A** (1981) 539
Diffusion in curved spaces
– On the path integral for — - Dekker **103A** (1980) 586
Diffusion, Lorentzian
– The Lorentzian diffusion of hydrogen in neon and xenon. I. Ne, Xe–H_2 - Wahby and Los **105A** (1981) 245
– The Lorentzian diffusion of hydrogen in neon and xenon. II. Ne, Xe–D_2 - Wahby and Los **105A** (1981) 257
– The Lorentzian diffusion of hydrogen in neon and xenon. III. Ne, Xe–Hd - Wahby and Los **105A** (1981) 264
Diffusion of spherical polymer
– Long time tail in the — - Jones **101A** (1980) 389
Diffusion processes
– Covariant Lagrangian of Onsager and Machlup without discretization - Zambrini **102A** (1980) 496
Diffusion processes (see *Critical dynamics*) **103A** (1980) 55
Diluted gases (see *Ion–molecule reactions*) **101A** (1980) 265
Diluted solutions (see *Ion–molecule reactions*) **101A** (1980) 265
Dimer system (see *Orientational transitions*) **105A** (1981) 347
Dipolar systems, two-dimensional (see *Coulomb systems, two-dimensional*) **109A** (1981) 237
Dipole–dipole interaction (see *Excitation spectrum*) **110A** (1982) 431
Disordered crystal
– On Green function averaging of a — - Ivanchenko and Lisyanskii **107A** (1981) 567
Disordered systems (see *Percolation problem*) **101A** (1980) 145
Dispersion relation of ripples on a surface (see *Ripples on a fluid surface*) **110A** (1982) 593
Displacement response (see *Band Jahn–Teller systems*) **110A** (1982) 373
Displacement response (see *Electron-phonon system*) **102A** (1980) 201
Dissipation, nonlinear (see *Multiplicative noise*) **109A** (1981) 483
Dissipative fluxes (see *Fluctuations, hydrodynamical*) **101A** (1980) 588
Distribution functions (see *Perturbation theory for quantum fluids*) **104A** (1980) 339

Distribution functions of hot electrons
– Gauge treatment of the intra-collisional-field-effect in electron transport theory - Pottier and Calecki **110A** (1982) 471
Duffing nonlinear oscillator (see *Fluctuations in nonlinear systems*) **104A** (1980) 480
Duffing nonlinear oscillator
– Time correlation functions and spectral distributions of the Duffing oscillator in a random force field - Dykman and Krivoglaz **104A** (1980) 495

Easy-plane ferromagnet (see *Green's functions, standard basis operator*) **108A** (1981) 180
Edge dislocation
– A KKR-approach to the calculation of the electronic structure for an — - Rotthier et al. **108A** (1981) 605
Efimov effect
– — and the third cluster coefficient of binary mixtures - Hoogeveen and Tjon ... **108A** (1981) 77
Ehrenfest urn model, generalized
– Discrete-time Glauber model as a generalized Ehrenfest urn model - Falk **104A** (1980) 459
Electric conductivity (see *Nonlinear nonequilibrium response*) **109A** (1981) 251
Electric dipole moments (see *Polar molecule in nonuniform electric field*) **108A** (1981) 205
Electric quadrupole moments (see *Polar molecule in nonuniform electric field*) ... **108A** (1981) 205
Electric resistivity (see *Scattering in a superconducting state*) **102A** (1980) 447
Electric susceptibility (see *Bloch electrons in uniform fields*) **107A** (1981) 587
Electrolytes, anomalous
– The pair distributions and the osmotic coefficient in anomalous electrolytes up to concentrations $c \approx 1$ mol/l - Lessner **110A** (1982) 617
Electromagnetic response
– The electric and magnetic response of a system in an external electromagnetic field - Adu-Gyamfi **108A** (1981) 575
Electron–electron collisions, relativistic (see *Boltzmann theory, relativistic*) **107A** (1981) 48
Electron–electron interactions (see *Conductance theory, quantum-statistical*) **101A** (1980) 243
Electron gas
– Diamagnetism of an — and surface currents - Jancovici **101A** (1980) 324
Electron gas (see *Two-dimensional electron gas*) **102A** (1980) 532
Electron gas (see *Two-dimensional electron gas*) **103A** (1980) 621
Electron gas in uniform field
– Statistical mechanics of a confinement electron gas in a uniform electromagnetic field - Vlachos and Jannussis **107A** (1981) 598
Electron gas, non-equilibrium
– Is a Fermi–Dirac distribution function for a non-equilibrium electron gas in high crossed electric and magnetic fields possible? - Calecki and Pottier **102A** (1980) 512
Electron–hole plasma, inhomogeneous
– Density-functional method for the inhomogeneous electron–hole plasma in polar substances - Henneberger et al. **109A** (1981) 161
Electronic excitations in superconductors (see *Cooper coupling of electrons*) **105A** (1981) 86
Electronic relaxation processes (see *Relaxation processes*) **101A** (1980) 67
Electron–nuclear system (see *Rate processes*) **101A** (1980) 67
Electron–phonon system
– Multiple band electron–phonon transport theory. I. Generating functional approach and generalized response - Kragler **102A** (1980) 22
– Multiple band electron–phonon transport theory. II. Derivation of transport

equation - Kragler **102A** (1980) 201
Electron plasma (see *Test particle problems*) **105A** (1981) 380
Electron transport theory
– Gauge treatment of the intra-collisional-field-effect in — - Pottier and Calecki **110A** (1982) 471
Elimination problem in kinetic theory
– The exact solution of an —. I. The one-dimensional hard sphere gas - Evans **102A** (1980) 87
Elimination problem in kinetic theory
– The exact solution of an —. II. General pairwise interparticle theory - Evans ... **104A** (1980) 48
Ellipsometric coefficient
– Electric and magnetic susceptibilities for a fluid–fluid interface; the — - Zielinska et al. **107A** (1981) 91
Emission noise
– Superstatistical — - Van Vliet et al. **108A** (1981) 511
Energy fluctuations in solids
– Further development of the kinetic many-body concept of large energy fluctuations and rate processes in solids - Khait **103A** (1980) 1
Energy gap of superconductors (see *Cooper coupling of electrons*) **105A** (1981) 86
Energy spectrum (see *Para-Bose oscillators*) **101A** (1980) 1
Enskog theory
– The asymptotics of the correlation functions in the generalized model of Boltzmann–Enskog - Sadovnikov et al. **110A** (1982) 329
Enskog theory (see *Generalized Enskog equation*) **101A** (1980) 351
Enskog theory, corrected (see *Ethylene*) **107A** (1981) 307
Enskog–Thorne theory
– Density dependence and composition dependence of the viscosity of neon–helium and neon–argon mixtures - Kestin et al. **106A** (1981) 415
Entropy (see *Hubbard model, one-dimensional*) **109A** (1981) 618
Entropy of the spin-glass state
– — in the binary mixture of the ferro- and antiferromagnetic random Ising model at $T=0$ - Katsura **104A** (1980) 333
Entropy production
– — in a relativistic multicomponent gas - Ekiel-Jezewska **109A** (1981) 278
Equation of state of a fluid (see *Burnett experiment*) **105A** (1981) 536
Equation of states for nondegenerate quantum systems
– Bound states and — with short-range interactions - Gau et al. **109A** (1981) 531
Equilibrium, marginal
– Growth of fluctuations from a marginal equilibrium - Caroli et al. **101A** (1980) 581
Equilibrium of three liquid phases
– The — upon approach to the tricritical point in water–acetonitrile–benzene-n-hexane mixtures-Bocko **103A** (1980) 140
Equilibrium properties (see *Two-dimensional Coulomb gas*) **104A** (1980) 447
Ergodic properties (see *Particles on a ring*) **109A** (1981) 500
Errata
– Response of a semi-infinite cubic lattice to uniform electric fields - Lehnen and Bruch [Physica 100A (1980) 215] **104A** (1980) 358
– Local field in fluid dielectrics: a two-parameter mean field approach - Bonneville [Physica 102A (1980)49] **104A** (1980) 621

Erratum
– Wall induced polarization in plane couette flow of a polyatomic gas in the Knudsen regime - Cercignani and Lampis [Physica 99A (1979) 305] **101A** (1980) 634
Erratum
– Static dielectric properties of Stockmayer fluids - Pollock and Alder [Physica 102A (1980) 1] **105A** (1981) 363
Erratum
– Experimental error of the Barnet experiment - Kell [Physica 105A (1981) 536] .. **108A** (1981) 279
Erratum
– Variational principle for regular and random Ising models on the cactus tree or on the usual lattice in the "cactus approximation" - Morita [105A (1981) 629] ..... **109A**(1981) 364
Esaki effect
– Theory of nonlinear nonequilibrium response. Application to the — - Murayama **109A** (1981) 251
Ethane (see *Thermal conductivity*) **103A** (1980) 521
Ethane, compressed gaseous (see *Ethane, liquid*) **108A** (1981) 143
Ethane, liquid
– Measurements of the viscosity of compressed gaseous and liquid ethane - Diller and Saber **108A** (1981) 143
Ethylene
– Self-diffusion in gaseous and liquid — - Arends et al. **107A** (1981) 307
Ethylene (see *PVT data for ethylene*) **104A** (1980) 255
Ethylene (see *Thermal conductivity*) **103A** (1980) 521
Evolution equation of the probability (see *Master equation near a non-equilibrium transition*) **101A** (1980) 518
Excess Helmholtz free energy (see Thermodynamic perturbation theory) **110A** (1982) 565
Exchange, anisotropic (see *Honeycomb lattice*) **107A** (1981) 629
Exchange, biquadratic
– Exact solution of the impure one-dimensional *n*-vector model with bilinear and biquadratic exchange interactions - Knezević and Milosević **107A** (1981) 255
Exchange–correlation effects (see *Model-potential theory*) **105A** (1981) 607
Exchange effects (see *One-component plasma*) **102A** (1980) 327
Exchange energy (see *Two-dimensional electron gas*) **103A** (1980) 621
Exchange integrals (see *Mixtures of Ising and Heisenberg substances*) **101A** (1980) 507
Excitation spectrum
– Cooperative and interference effects in the resonance fluorescence of two identical three-level atoms at high photon densities - Mavroyannis **110A** (1982) 431
Excitation spectrum (see *Photon density–density correlations*) **105A** (1981) 203
Exciton–photon interaction (see *Soliton transformation*) **110A** (1982) 580
Excitons (see *Soliton transformation*) **110A** (1982) 580
Extended irreversible thermodynamics (see *Heat conduction*) **107A** (1981) 393
Extended irreversible thermodynamics (see *Thermal fluctuations*) **109A** (1981) 208

Far-infrared absorption
– Internal field correction in — of highly polar liquids - Bossis **110A** (1982) 408
Faxén's theorem (see *Brownian motion of n spheres*) **110A** (1982) 128
Faxén's theorem, generalization
– A generalization of Faxén's theorem to nonsteady motion of an almost

spherical drop in an arbitrary flow of a compressible fluid - Kaneda **101A** (1980) 407
$FeBr_2$ (see *Magnons spectrum*) **103A** (1980) 274
$FeCl_2$ (see *Metamagnets*) **103A** (1980) 226
Fermi–Dirac distribution function of an electron gas (see *Electron gas, non-equilibrium*) **102A** (1980) 512
Fermi–Dirac statistics
– — for free electrons in uniform electric and magnetic fields - Jannussis **107A** (1981) 575
Fermi–Dirac statistics (see *Confinement electron gas*) **107A** (1981) 598
Fermions (see *Pressure inequalities in quantum statistics*) **106A** (1981) 603
Fermion systems, one-dimensional
– A quantum field theory of crystals. III. A two-band model in one-dimensional fermion systems - Kitamura **110A** (1982) 282
Ferroelectrics (see *Hydrogen bonded ferroelectrics*) **102A** (1980) 554
Ferroelectrics (see *Hydrogen-bonded ferroelectrics*) **107A** (1981) 201
Ferromagnetism
– On coexistence of superconductivity and — - Bogolubov Jr. et al. **101A** (1980) 613
Ferromagnets (see *Green's functions, standard basis operator*) **108A** (1981) 180
Ferromagnet with paramagnetic fluctuations
– Exact solutions for heterophase ferromagnets - Shumovsky and Yukaolov **110A** (1982) 518
Field fluctuations (see *Onsager model, dynamical*) **105A** (1981) 219
Finite collision frequency (see *Hyperbolic diffusion equation*) **101A** (1980) 629
Finite size scaling (see *Potts model*) **104A** (1980) 352
Five-point cluster calculations (see *Cluster-variation method*) **109A** (1981) 445
Flow birefringence
– Nonspherical Brownian particles. Kinetic description and application to — - Kagermann et al. **105A** (1981) 271
Fluctuating hydrodynamics
– Brownian motion of an almost spherical drop of viscous fluid and — - Kaneda . **101A** (1980) 423
Fluctuating hydrodynamics (see *Light scattering from a fluid*) **107A** (1981) 491
Fluctuating systems, contracted description
– Contracted description of fluctuating systems - Felderhof and Jones **102A** (1980) 179
Fluctuation–dissipation relations, nonlinear
– Nonlinear fluctuation–dissipation relations and stochastic models in non-equilibrium thermodynamics. II. Kinetic potential and variational principles for nonlinear irreversible processes - Bochkov and Kuzovlev **106A** (1981) 480
Fluctuation–dissipation theorem
– Contracted description of fluctuating systems - Felderhof and Jones **102A** (1980) 179
Fluctuation–dissipation theorem (see *Thermal fluctuations*) **109A** (1981) 208
Fluctuation–dissipation theorem, generalized
– Nonlinear fluctuation–dissipation relations and stochastic models in non-equilibrium thermodynamics. I. Generalized fluctuation–dissipation theorem - Bochkov and Kuzovlev **106A** (1981) 443
Fluctuation-dissipation theorems (see *Nonlinear hydrodynamic fluctuations*) **110A** (1982) 147
Fluctuation–dissipation theory
– Spatial correlations in nonequilibrium systems: the effect of diffusion - Medina-Noyola and Keizer **107A** (1981) 437
Fluctuations (see *Equilibrium, marginal*) **101A** (1980) 581
Fluctuations (see *Metamagnets*) **103A** (1980) 257
Fluctuations (see *Stochastic differential equations*) **107A** (1981) 143

Fluctuations during spinodal decomposition
– Dynamic correlation of — - Billotet and Binder **103A** (1980) 99
Fluctuations, hydrodynamical
– Hydrodynamical fluctuations in extended irreversible thermodynamics - Jou et al. **101A** (1980) 588
Fluctuations in a fluid
– Hydrodynamic fluctuations forces - Jones **105A** (1981) 395
Fluctuations in nonlinear systems
– — near bifurcations corresponding to the appearance of new stable states - Dykman and Krivoglaz **104A** (1980) 480
Fluctuation spectra (see *Conserved densities*) **109A** (1981) 555
Fluctuations, strength of
– WKB-type expansion for Langevin equations - Langouche et al. **101A** (1980) 301
Fluctuation theorems
– — for dielectrics with periodic boundary conditions - Felderhof **101A** (1980) 275
Fluctuation theory
– On the theory of fluctuations around non-equilibrium steady states. A generalized time-convolutionless projector formalism - Tokuyama **102A** (1980) 399
Fluid–fluid interface
– Electric and magnetic susceptibilities for a —; the ellipsometric coefficient - Zielinska et al. **107A** (1981) 91
Fluids (see *Dielectric constant of fluids*) **104A** (1980) 573
Fluids (see *Stockmayer fluids*) **102A** (1980) 1
Fluids (see *Relative motions in atomic fluids*) **102A** (1980) 70
Fluid–solid phase transition (see *One-component plasma*) **102A** (1980) 327
Fluids with long-range interactions (see *Cluster expansion for fluids*) **102A** (1980) 145
Fluids with spin
– Non-equilibrium thermodynamics of interfacial systems. II. Boundary conditions for — - Kovac **107A** (1981) 280
Fluid, two-component (see *Ripples on a fluid surface*) **110A** (1982) 593
Fluid undergoing Couette flow (see *Shear flow*) **108A** (1981) 567
Fluid under shear
– Computer simulation of an m–6–8 — - Evans and Hanley **103A** (1980) 343
Fluid, viscous (see *Viscous drop, almost spherical*) **101A** (1980) 423
Fluorescence (see *Two-photon resonance fluorescence*) **102A** (1980) 193
Fluorescence (see *Cooperative two-photon resonance fluorescence*) **102A** (1980) 431
Fokker–Planck equation
– Solution of the — with spatial coordinate-dependent moments - Morita and Hara **101A** (1980) 283
– Exact thermodynamic behaviour of a collective atomic system in an external field - Puri and Lawande **101A** (1980) 599
Fokker–Planck equation
– Nonspherical Brownian particles. Kinetic description and application to flow birefringence - Kagermann et al. **105A** (1981) 271
Fokker–Planck equation (see *Brownian motion in Oseen's approximation*) **109A** (1981) 293
Fokker–Planck equation (see *Brownian motion of an oscillator*) **110A** (1982) 321
Fokker–Planck equation (see *Markov processes, quasi*) **103A** (1980) 172
Fokker–Planck equation (see *Nonlinear hydrodynamic fluctuations*) **110A** (1982) 147
Fokker–Planck equation (see *Onsager–Machlup Lagrangian*) **102A** (1980) 496

Fokker–Planck equation (see *Relaxation near the instability point*) **105A** (1981) 631
Fokker–Planck equation (see *Stochastic one-variable system*) **101A** (1980) 581
Fokker–Planck equation (see *Thermalization of beams of charged particles*) **109A** (1981) 305
Fokker–Planck equation, generalized (see *Brownian motion of charged carriers*) **110A** (1982) 489
Fokker–Planck equation, generalized (see *Correlation functions, low-frequency*) . **110A** (1982) 201
Fokker–Planck equation, nonlinear
– On fluctuations and relaxation in systems described by a one-dimensional Fokker–Planck equation with a time-dependent potential - Caroli et al. **108A** (1981) 233
Fokker–Planck equations (see *Non-stationary processes in lasers*) **105A** (1981) 105
Force–force correlation function method (see *Conductance theory, quantum-statistical*) **101A** (1980) 243
Force multipole moments
– — for a spherically symmetric particle in solution - Schmitz **102A** (1980) 161
Four-particle interactions (see *Ising model, three-dimensional*) **107A** (1981) 464
Four-spin interactions (see *Two-sublattice spin model*) **103A** (1980) 226
Four-spin interactions (see *Two-sublattice spin model*) **103A** (1980) 257
Fourth moment (see *Random walk*) **110A** (1982) 535
Free electrons (see *Electron transport theory*) **110A** (1982) 471
Free electrons in uniform fields
– Fermi–Dirac statistics for free electrons in uniform electric and magnetic fields - Jannussis et al. **107A** (1981) 575
Free energy (see *Cluster Ising models*) **108A** (1981) 473
Free energy (see *Linear chain, classical*) **108A** (1981) 169
Free energy (see *Metamagnets*) **103A** (1980) 257
Free energy (see *Systems of point particles in equilibrium*) **110A** (1982) 302
Frequency fluctuations (see *Brownian motion of harmonic systems*) **105A** (1981) 445
Friction coefficient of a disk (see *Friction coefficient, translational*) **108A** (1981) 598
Friction coefficient, translational
– Friction coefficient of a disk in a sheet of viscous fluid: numerical calculation - Heringa et al. **108A** (1981) 598
Friction constant (see *Colloidal suspensions*) **103A** (1980) 325
Friction constant (see *Kramers equation*) **110A** (1982) 106
Friction tensors (see *Brownian motion of n spheres*) **110A** (1982) 128
Friedrichs model
– Physical description of decay processes - Henin and Mayné **108A** (1981) 281
Frustration (see *Random bond Ising model*) **104A** (1980) 397
Frustration effect (see *Ising model, random planar*) **103A** (1980) 633

Gapless phonons (see *Quantum field theory of crystals*) **110A** (1982) 270
Gap parameter (see *Superconductivity*) **107A** (1981) 330
Gas–gas equilibria
– Vapour–liquid and — in simple systems. V. The system neon–xenon - Deerenberg et al. **101A** (1980) 459
Gas–gas equilibria
– Vapour–liquid and — in simple systems. VI. The critical exponents β_P and β_I of the system neon–xenon - Deerenberg et al. **103A** (1980) 183
Gas–gas equilibria of the first kind (see *One-fluid theory*) **109A** (1981) 265

Gas–gas equilibria of the second kind
– Cross-over of exponent values near the critical double point - Boots **103A** (1980) 316
Gas of hard spheres
– Derivation of the generalized Enskog equation for a — with a step repulsive barrier - Domaradzki **101A** (1980) 351
Generalized Enskog equation
– Derivation of the — for a gas of hard spheres with a step repulsive barrier - Domaradzki **101A** (1980) 351
Generalized frictional Hamiltonians (see *Correlated critical states*) **105A** (1981) 130
Generalized hydrodynamics (see *VH light scattering*) **108A** (1981) 583
Generalized kinetic equation (see *Enskog theory*) **110A** (1982) 329
Generalized nonlinear Schrödinger equation (see *Heisenberg continuum spin systems*) **107A** (1981) 533
Gibbs states (see *Weiss–Ising model, quantum-mechanical*) **108A** (1981) 107
Ginzburg–Landau constitutive equation (see *Heat flux*) **104A** (1980) 320
Glauber model
– Discrete-time — as a generalized Ehrenfest urn model - Falk **104A** (1980) 459
Glauber model
– Exact approach to equilibrium for the — of a one-dimensional Ising system with random $\pm J$ bonds - Falk **104A** (1980) 475
Grand unified theories
– On the use of statistical concepts in — - Dresden **110A** (1982) 1
Gravitation fields
– — near the naked singularities of the general type - Parnovsky **104A** (1980) 210
Green function averaging (see *Disordered crystal*) **107A** (1981) 567
Green function formalism (see *Edge dislocation*) **108A** (1981) 605
Green function of the imperfect lattice (see *Point imperfection*) **103A** (1980) 205
Green functions (see *Ising model in the transverse field*) **103A** (1980) 609
Green's functions, standard basis operator
– Self-consistent many-body theory for the standard basis operator Green's functions - Micnas and Kishore **108A** (1981) 180
Gross–Jackson procedure (see *Kinetic modeling*) **105A** (1981) 147
Ground state dynamics (see *Weiss–Ising model, quantum-mechanical*) **108A** (1981) 107
Ground-state energies (see *Antiferromagnetic lattices*) **104A** (1980) 298
Group theory (see *Symmetry-adapted linear combinations for a finite group*) **105A** (1981) 577
Guggenheim equation of state (see *One-fluid theory*) **109A** (1981) 265

H_2 (see *Hydrogen isotopes*) **104A** (1980) 509
H_2 (see *Hydrogen isotopes*) **104A** (1980) 548
Hard-core fluids (see *Liquid instability*) **102A** (1980) 523
Hard core statistical ensembles (see *Defects in hard core statistical ensembles*) **109A** (1981) 58
Hard-sphere fluid (see *Radial distribution function*) **105A** (1981) 601
Hard-sphere Lorentz gas
– Statistical dynamics of conserved densities for the — - Haus and Lücke **109A** (1981) 555
Hard-sphere system (see *Enskog theory*) **110A** (1982) 329
Harmonic lattice (see *Test particle problems*) **105A** (1981) 380
Harmonic oscillator (see Stochastic-electrodynamics) **109A** (1981) 178
Harmonic oscillator (see *Wigner function, smoothed*) **109A** (1981) 193
Harmonic oscillator, damped and forced

– Quantum friction in phase space - Jannussis et al. **102A** (1980) 561
Harmonic oscillator, damped, randomly perturbed
– Processes with delta-correlated cumulants - Van Kampen **102A** (1980) 489
Harmonic oscillator, damped, randomly perturbed (see *Brownian motion of harmonic systems*) **102A** (1980) 470
Harmonic oscillator, damped time-dependent
– Constants of motion and non-stationary wave functions for the damped, time-dependent harmonic oscillator - Ramand **103A** (1980) 35
Harmonic oscillator, linearly damped
– Oscillators and complex Hamiltonian calculus - Dedene **103A** (1980) 371
Harmonic oscillator, time-dependent
– On the phase-space dynamics of a time-dependent harmonic oscillator at finite temperature - Remaud and Hernandez **107A** (1981) 553
HD (see *Hydrogen isotopes*) **104A** (1980) 509
HD (see *Hydrogen isotopes*) **104A** (1980) 548
He–Ar system (see *Thermal diffusion factors*) **108A** (1981) 502
Heat conduction
– Two continuum approaches to a wavelength-dependent description of — - Bampi et al. **107A** (1981) 393
Heat conductivity (see *Transport coefficients*) **110A** (1982) 81
Heat conductivity, anomalous
– Anomalous heat conductivity for a weakly ionized plasma in a strong magnetic field - Kagermann and Köhler **102A** (1980) 344
Heat flux
– On a Ginzburg–Landau constitutive equation for the evolution and fluctuations of the — - Jou and Pérez-Garcia **104A** (1980) 320
Heavy ions in light gases
– — in an electric field. I. Limits of validity of the Kihara distribution - Ferrari ... **101A** (1980) 491
He–CO_2 system (see *Thermal diffusion factors*) **108A** (1981) 502
Heisenberg chain (see *Antiferromagnetic lattices*) **104A** (1980) 298
Heisenberg chain (see *Three magnon bound state equation*) **107A** (1981) 212
Heisenberg continuum spin systems
– On the evolution of higher dimensional — - Lakshmanan and Daniel **107A** (1981) 533
Heisenberg-like interactions (see *Critical temperature*) **108A** (1981) 164
Heisenberg model, classical (see *n-vector model*) **107A** (1981) 255
Heisenberg spin chain
– Equation of motion for the — - Quispel and Capel **110A** (1982) 41
Helium (see *Burnett experiment*) **105A** (1981) 536
He–SF_6 system (see *Thermal diffusion factors*) **108A** (1981) 502
Heterophase fluctuations
– Statistical theory of — - Yukalov **108A** (1981) 402
Heterophase systems
– Spaces of states for — - Yukalov **110A** (1982) 247
Hidden variable thermodynamics (see *Heat conduction*) **107A** (1981) 393
Higgs mechanism
– A microscopic theory of vortices in superfluid helium - Ichiyanagi **107A** (1981) 371
Higher order time correlations (see *Mode coupling theory*) **107A** (1981) 25
High-frequency thermometry (see *Heat conduction*) **107A** (1981) 393
High order response functions (see *Nonlinear response theory*) **109A** (1981) 221

Honeycomb lattice
– Magnetic specific heat of the — of spin one-half with anisotropic Heisenberg exchange by a new method - Tanaka and Uryû **107A** (1981) 629
Hopping model
– On the connection between the macroscopical and microscopical evolution in an exactly soluble —. I. Neutral particles - Bányai and Gartner **102A** (1980) 357
Hopping model, for charged particles
– On the connection between the macroscopical and microscopical evolution in an exactly soluble hopping model. II. Charged particles - Bányai and Gartner **103A** (1980) 119
Hopping rate equation (see *Hopping model, for charged particles*) **103A** (1980) 119
Hopping rate equations (see *Hopping model*) **102A** (1980) 357
Hot-spot model (see *Superconducting microbridge*) **105A** (1981) 1
Hubbard model (see *Green's functions, standard basis operator*) **108A** (1981) 180
Hubbard model, one-dimensional
– Renormalization group approach to the one-dimensional Hubbard model - Takano and Suzuki **109A** (1981) 618
Hybrid atomic orbitals (see *Symmetry-adapted linear combinations for a finite group*) **105A** (1981) 577
Hybrid atomic orbitals (see *Symmetry-adapted linear combinations for a finite group*) **106A** (1981) 521
Hydrodynamic equations (see *Brownian particles, interacting*) **107A** (1981) 190
Hydrodynamic equations for binary mixture (see *Diffusion equations in the Burnett regime*) **106A** (1981) 539
Hydrodynamic fluctuation forces
– — - Jones **105A** (1981) 395
Hydrodynamic fluctuations, nonlinear (see *Nonlinear hydrodynamic fluctuations*) **110A** (1982) 147
Hydrodynamic fluctuations
– On the theory of fluctuations around non-equilibrium steady states. A generalized time-convolutionless projector formalism - Tokuyama **102A** (1980) 399
Hydrodynamic mean-field model (see *Ripples on a fluid surface*) **110A** (1982) 593
Hydrodynamics
– — and molecular motion: a phenomenological approach - Evans and Grigolini **105A** (1981) 31
Hydrodynamics (see *Ideal hydrodynamics*) **108A** (1981) 557
Hydrodynamics (see *Viscoelastic systems*) **107A** (1981) 126
Hydrodynamics, discrete
– Critical fixed points in discrete hydrodynamics - Visscher **108A** (1981) 153
Hydrodynamics for an ideal fluid
– —: Hamiltonian formalism and Liouville-equation - Van Saarloos et al. **107A** (1981) 109
Hydrodynamics of plasma
– — in a dense pinch - Meierovich **105A** (1981) 313
Hydrodynamics of simple fluids (see *Mode coupling theory*) **107A** (1981) 25
Hydrodynamic systems (see *Propagating modes*) **105A** (1981) 330
Hydrodynamic theory (see *Kinetic modeling*) **105A** (1981) 147
Hydrogen atom (see *Stochastic electrodynamics*) **109A** (1981) 178
Hydrogen atom (see *Wigner function, smoothed*) **109A** (1981) 193

Hydrogen bonded ferroelectrics
– Solitons in pseudo one-dimensional — - Stamenković and Žakula **102A** (1980) 554
Hydrogen-bonded ferroelectrics
– Dynamics of proton–lattice interaction in — - Cheung **107A** (1981) 201
Hydrogen in neon and xenon
– The Lorentzian diffusion of —. I. Ne, Xe–H_2 - Wahby and Los **105A** (1981) 245
– The Lorentzian diffusion of —. II. Ne, Xe–D_2 - Wahby and Los **105A** (1981) 257
– The Lorentzian diffusion of —. III. Ne, Xe–HD - Wahby and Los **105A** (1981) 264
Hydrogen isotopes
– The broadening and shift of the rotational Raman lines for — at low temperatures - Van den Hout et al. **104A** (1980) 509
– The broadening of the depolarized Rayleigh line for — at low temperatures - Van den Hout et al. **104A** (1980) 548
Hyperbolic diffusion equation
– A — taking a finite collision frequency into account - De Jagher **101A** (1980) 629

Ideal fluid (see *Hydrodynamics for an ideal fluid*) **107A** (1981) 109
Ideal hydrodynamics
– A canonical transformation relating the Lagrangian and Eulerian description of — - Van Saarloos **108A** (1981) 557
Impurities (see *Ising model, quenched*) **103A** (1980) 633
Impurities (see *n-vector model*) **107A** (1981) 255
Impurity states within a bond gap (see *Semiconductors, deep levels in*) **104A** (1980) 233
Induced quantum stochastic processes
– —: a solvable example of a quantum system strongly coupled with a reservoir - Kosloff **110A** (1982) 346
Infrared absorption band (see *Rotational kinetic energy*) **105A** (1981) 417
Initial susceptibility (see *n-vector model*) **107A** (1981) 255
Initial value problems (see *One-dimensional hard sphere gas*) **102A** (1980) 87
Intensity fluctuations (see *Dicke model*) **103A** (1980) 213
Interaction between laser field and atoms (see *Laser master equation*) **104A** (1980) 126
Interface between two phases
– Pinning of a rough interface by an external potential - Van Leeuwen and Hilhorst **107A** (1981) 319
Interface gas–solid (see *Boundary conditions for polyatomic gases*) **104A** (1980) 1
Interface, noncritical
– Noncritical interface near a critical end point II - Ramos-Gómez and Widom ... **104A** (1980) 595
Interfacial dynamics, two and three-dimensional
– Two and three-dimensional interfacial dynamics - Dumais **104A** (1980) 143
Interfacial electromagnetic properties
– On the description of — using singular fields, charge density and currents at a dividing surface - Albano et al. **102A** (1980) 105
Interfacial entropy production (see *Boundary conditions for polyatomic gases*) ... **104A** (1980) 1
Interfacial fluid membrane
– Thermodynamics of an — - Grauel **103A** (1980) 468
Interfacial systems
– Non-equilibrium thermodynamics of —. II. Boundary conditions for fluids with spin - Kovac **107A** (1981) 280
Internal degrees of freedom (see *Stress tensor, asymmetric*) **105A** (1981) 169

Internal state models
– Soluble Boltzmann equations for internal state and Maxwell models - Futcher et al. **101A** (1980) 185
Internal vectorial variables (see *Dielectric relaxation*) **109A** (1981) 123
Interparticle potentials (see *Elimination problem in kinetic theory*) **104A** (1980) 48
Interstitial imperfection (see *Nonsubstitutional impurity cluster*) **108A** (1981) 622
Intra-collisional-field-effect (see *Electron transport theory*) **110A** (1982) 471
Ionic anisotropy (see *Anisotropic cubic systems*) **109A** (1981) 579
Ionic sound oscillations
– Hydrodynamics of plasma in a dense pinch - Meierovich **105A** (1981) 313
Ionic systems
– Computer simulation of —. Influence of boundary conditions - De Leeuw and Perram **107A** (1981) 179
Ionization potentials (see *Xenon fluorides*) **101A** (1980) 22
Ion–molecule reactions
– Theoretical study of the electric field effect on — in diluted gases and solutions - Stiller and Naumann **101A** (1980) 265
Irreversible phenomena (see *Koopman's Lemma*) **102A** (1980) 379
Irreversible thermodynamics
– Hydrodynamical fluctuations in extended — - Jou et al. **101A** (1980) 588
Irreversible thermodynamics, extended (see *Heat flux*) **104A** (1980) 320
Ising antiferromagnet, triangular
– Phase diagram of the triangular Ising antiferromagnet - Dóczi-Réger and Hemmer **108A** (1981) 531
Ising-like interactions (see *Critical temperature*) **108A** (1981) 164
Ising magnet
– Kinetics of the —. I. General theory - Berim and Kessel **101A** (1980) 112
– Kinetics of the —. II. One-dimensional model - Berim and Kessel **101A** (1980) 127
Ising model (see *Kinetics of the Ising magnet*) **105A** (1981) 187
Ising magnet (see *Kinetics of the Ising magnet*) **101A** (1980) 255
Ising model (see *Lattices, two-dimensional decorated*) **110A** (1982) 339
Ising model (see *Random bond Ising model*) **104A** (1980) 115
Ising model (see *Random bond Ising model*) **104A** (1980) 397
Ising model (see *Random bond Ising model*) **107A** (1981) 360
Ising model (see *Random Ising model on the linear chain*) **103A** (1980) 354
Ising model (see *Spin 1 Ising model*) **109A** (1981) 352
Ising model in the transverse field
– Low-temperature properties of the — and the influence of kinematical effects - Kapor and Tošić **103A** (1980) 609
Ising model, on the square lattice
– Numerical calculation of the thermodynamic properties of the — - Morita **107A** (1981) 609
Ising model, quenched
– Critical temperature for random planar model with frustration - Longa (*Letter to the Editor*) **103A** (1980) 633
Ising model (random) on the cactus tree
– Variational principle for regular and — or on the usual lattice in the "cactus approximation - Morita **105A** (1981) 620
Ising model, random planar
– Critical temperature for random planar model with frustration - Longa (*Letter to the Editor*) **103A** (1980) 633

Ising models, triangular
– Second-order phase transitions on triangular Ising models with two- and three-spin interactions - Dóczi-Réger and Hemmer **109A** (1981) 541
Ising model, three-dimensional
– Three-dimensional Ising model with four-particle interactions - Zhelifonov **107A** (1981) 464
Ising model, two-dimensional (see *Interface between two phases*) **107A** (1981) 319
Ising model with vacancies
– Cross-over to classical behaviour for an — - Rijpkema and Knops **108A** (1981) 589
Ising system (see *One-dimensional Ising system*) **104A** (1980) 475
Itinerant oscillator model
– An alternative stochastic formulation of the — - Bellemans **102A** (1980) 547

Jahn–Teller effect in crystals
– —: optical response function and vibronic states - Barchielli **110A** (1982) 451
Jahn–Teller systems
– — as displaced para-Bose oscillators - Schmutz **101A** (1980) 1
Jahn–Teller systems (see *Band Jahn–Teller systems*) **110A** (1982) 373

Kihara distribution
– Heavy ions in light gases in an electric field. I. Limits of validity of the — - Ferrari **101A** (1980) 491
Kinematical effects (see *Ising model in the transverse field*) **103A** (1980) 609
Kinetic coefficients (see *Correlation functions, low-frequency*) **110A** (1982) 201
Kinetic Ising model (see *Hydrogen bonded ferroelectrics*) **102A** (1980) 554
Kinetic modeling
– — of polyatomic gas mixtures - Philippi **105A** (1981) 147
Kinetic potential (see *Fluctuation–dissipation relations, nonlinear*) **106A** (1981) 480
Kinetics of spinodal decomposition
– A memory function equation approach to the — in the very early linear regime - Wong and Meijer **110A** (1982) 188
Kinetics of the Ising magnet
– —. III. The influence of the alternating field and non-equilibrium states of the reservoir of the dipole–dipole interactions upon the one-dimensional Ising model kinetics - Berim et al. **105A** (1981) 187
Kinetic theory
– Kinetics of the Ising magnet. I. General theory - Berim and Kessel **101A** (1980) 112
– Kinetics of the Ising magnet. II. One-dimensional model - Berim and Kessel **101A** (1980) 127
Kinetic theory
– On the Senftleben–Beenakker effect on the thermal conductivity - Thijsse et al. . **102A** (1980) 281
– Anomalous heat conductivity for a weakly ionized plasma in a strong magnetic field - Kagermann and Köhler **102A** (1980) 344
Kinetic theory
– Quantum-kinetic equations for time correlation functions in higher-order perturbation theory - Leermakers and Suttorp **108A** (1981) 333
Kinetic theory (see *Brownian particle, strongly interacting*) **108A** (1981) 441
Kinetic theory (see *Energy fluctuations in solids*) **103A** (1980) 1
Kinetic theory (see *Elimination problem in kinetic theory*) **102A** (1980) 87
Kinetic theory (see *Elimination problem in kinetic theory*) **104A** (1980) 48
Kinetic theory (see *Liquid phase instability criterion*) **109A** (1981) 357

Kinetic theory (see *Quantum kinetic equations*) **109A** (1981) 517
Kinetic theory (see *Stochastic equations of motion*) **109A** (1981) 1
Kinetic theory (see *Two-level open systems*) **101A** (1980) 552
Kinetic theory of self-diffusion
– — in a moderately dense one-component plasma - Suttorp **104A** (1980) 25
Kirkwood–Salsburg equations
– On the Kirkwood–Salsburg and Mayer–Montroll equations and their solutions for many-body interactions - Moraal **105A** (1981) 286
– On the solutions of the equilibrium BBGKY equations - Moraal **105A** (1981) 297
Kirkwood–Salsburg equations (see *Product property of distribution functions*) ... **105A** (1981) 303
Kirkwood-type correlation equations (see *Classical continuous systems*) **109A** (1981) 403
Knudsen gas flow
– Experiments on the influence of a magnetic field on a molecular — - Breunese et al. **109A** (1981) 347
Knudsen gas, molecular
– Transport phenomena in molecular Knudsen gas - Knaap and Kuščer **104A** (1980) 95
Knudsen gas, polyatomic (see *Boundary conditions for polyatomic gases*) **104A** (1980) 1
Koopman's Lemma
– On converse to — - Goodrich and Gustafson **102A** (1980) 379
Korteweg–de Vries equation (see *Nonlinear-dispersive waves*) **104A** (1980) 71
Kramers–Chandrasekhar equation (see *Brownian motion of charged carriers*) **110A** (1982) 489
Kramers equation
– Eigenvalues and eigenfunctions of the —. Application to the Brownian motion of a pendulum - Vollmer and Risken **110A** (1982) 106

Landau collision term (see *Boltzmann theory, relativistic*) **107A** (1981) 48
Landau equation, relativistic
– Relativistic Boltzmann theory for a plasma. VI. The relativistic Landau equation - Van Erkelens **107A** (1981) 48
Landau expansion (see *Liquid ^{3}He*) **106A** (1981) 369
Landau levels (see *Brownian motion of charged carriers*) **110A** (1982) 489
Langevin and Ito theories (see *Stochastic differential equations*) **103A** (1980) 630
Langevin equation (see *Multiplicative noise*) **109A** (1981) 483
Langevin equation (see *Nonlinear stochastic processes*) **109A** (1981) 128
Langevin-equation for a Brownian particle
– Contracted description of fluctuating systems - Felderhof and Jones **102A** (1980) 179
Langevin equations
– WKB-type expansion for — - Langouche et al. **101A** (1980) 301
Langevin equations
– WKB-type expansion for — - Langouche et al. **108A** (1981) 221
Laser master equation
– Correction to the — - Arimitsu **104A** (1980) 126
Laser radiation, WKB treatment
– WKB treatment of laser radiation in the transient unstable region - Arimitsu **107A** (1981) 71
Lasers (see *Non-stationary processes in lasers*) **105A** (1981) 105
Latex suspensions (see *Shear viscosity, dynamic*) **108A** (1981) 441
Lattice electron with friction (see *Quantum friction*) **106A** (1981) 611
Lattice model for liquids (see *Phase diagram of water*) **109A** (1981) 365

Lattice polarization (see *Electron–hole plasma, inhomogeneous*) **109A** (1981) 161
Lattice sums (see *Coulomb systems, two-dimensional*) **109A** (1981) 237
Lattices, one-dimensional decorated
– One- and two-dimensional decorated lattices - Goncalves **110A** (1982) 339
Lattices, two-dimensional decorated
– One- and two-dimensional decorated lattices - Goncalves **110A** (1982) 339
Lennard–Jones potential (see *Soft-core molecules*) **104A** (1980) 197
Liapounov transformations (see *Decay processes*) **108A** (1981) 281
Life time of kinks (see *Thermal kinks*) **108A** (1981) 257
Light scattered by carbon dioxide and xenon
– Investigation of multiple scattering contributions to the depolarization of — in the critical region. I. Basic theoretical formulae and experimental data - Trappeniers et al. **101A** (1980) 431
Light scattering (see *Onsager model, dynamical*) **105A** (1981) 219
Light scattering from a fluid
– —. A semi-phenomenological calculation of the coupling constants between the orientational and translational motion - Aizenbud **107A** (1981) 404
– — with a stationary temperature gradient - Van der Zwan et al. **107A** (1981) 491
Light scattering in nonequilibrium systems (see *Mode coupling theory*) **107A** (1981) 25
Linear chain (see *Random Ising model on the linear chain*) **103A** (1980) 354
Linear chain classical
– On non-analytic thermodynamic behaviour of the classical linear chain - Van den Berg **108A** (1981) 169
Linear chain, disordered
– Central peak in the density of states of a disordered linear chain - Dhar **102A** (1980) 370
Linear response of stochastic multiperiodic systems
– — in stationary states with application to stochastic electrodynamics - Denis et al. **109A** (1981) 178
Lineshapes (see *Light scattering from fluids*) **107A** (1981) 404
Liouville equation
– Hydrodynamics for an ideal fluid: Hamiltonian formalism and — - Van Saarloos et al. **107A** (1981) 109
Liquid–crystalline transition
– Liquid–crystalline ordering in the solution of long persistent chains - Khokhlov and Semenov **108A** (1981) 546
Liquid dielectrics (see *Dielectric constant of a liquid*) **102A** (1980) 49
Liquid drops, charged
– Symmetric and asymmetric stabilities of charged liquid drops - Sabry **101A** (1980) 223
Liquid ^3He
– Separable interactions and — - Nijhoff and Capel **106A** (1981) 369
Liquid phase instability criterion
– On the — - Ryzhov and Tareyeva **109A** (1981) 357
Liquid stability
– Simple variational method for the closures of the Ornstein–Zernike equation: A study of liquid instability - Vicsek **102A** (1980) 523
Liquid surfaces (see *Liquid–vapour interface*) **101A** (1980) 99
Liquid–vapour interface
– Variation of the local field through the — - Castle and Lekner **101A** (1980) 99
Local equilibrium (see *Fluctuation–dissipation theory*) **107A** (1981) 437

Local fields
– — near the surface of a crystalline dielectric - Lekner and Castle **101A** (1980) 89
– Variation of the — through the liquid–vapour interface - Castle and Lekner **101A** (1980) 99
Local fields (see *Dielectric constant of a liquid*) **102A** (1980) 49
Local free energy functional (see *Critical wall perturbation*) **101A** (1980) 255
Local moments (see *Hubbard model, one-dimensional*) **109A** (1981) 618
Lorentz gas (see *Efimov effect*) **108A** (1981) 77
Lorentz model (see *Velocity autocorrelations*) **103A** (1980) 558
λ-transition
– Rescaled occupation number representation and the — - Lee **104A** (1980) 189
Luminescence, characteristic (see *Emission noise*) **108A** (1981) 511
Lyapunov functionals
– On a class of — of the Boltzmann equations and their generalizations - Maass .. **109A** (1981) 328

Magnetic alloys, dilute
– Thermodynamic properties of dilute magnetic alloys: exact cluster solutions - Oleś et al. **104A** (1980) 309
Magnetic dipole–dipole interactions (see *Kinetics of the Ising magnet*) **105A** (1981) 187
Magnetic exponent of Ising model
– The calculation of the magnetic exponent in real space differential renormalization - Payandeh and Van Leeuwen **106A** (1981) 589
Magnetic field effect (see *Knudsen gas flow*) **109A** (1981) 347
Magnetic flux loops gas (see *Aharonov–Bohm effect*) **109A** (1981) 609
Magnetic impurity in nonmagnetic metal
– Thermodynamic properties of dilute magnetic alloys: exact cluster solutions - Oleś et al. **104A** (1980) 309
Magnetic impurity scattering (see *Scattering in a superconducting state*) **102A** (1980) 447
Magnetic properties
– — of a nearly classical one-component plasma in three or two dimensions - Alastuey and Jancovici **102A** (1980) 327
Magnetic properties (see *Plasma, two-dimensional one-component*) **110A** (1982) 293
Magnetic relaxation
– On vectorial internal variables and dielectric and — phenomena - Kluitenberg .. **109A** (1981) 91
Magnetic resonance saturation
– — in solids at finite temperatures - De Haas et al. **103A** (1980) 295
Magnetic scattering of neutrons
– Wreath groups - Litvin **101A** (1980) 339
Magnetic specific heat
– — of the honeycomb lattice of spin one-half with anisotropic Heisenberg exchange by a new method - Tanaka and Uryû **107A** (1981) 629
Magnetic susceptibility
– Fermi–Dirac statistics for free electrons in uniform electric and magnetic fields - Jannussis et al. **107A** (1981) 575
Magnetic susceptibility (see *Bloch electrons in uniform fields*) **107A** (1981) 587
Magnetic susceptibility (see *Spin systems, one- and two-dimensional*) **105A** (1981) 493
Magnetic susceptibility (see *Two-dimensional electron gas*) **102A** (1980) 532
Magnetic transition (see *Heterophase system*) **110A** (1982) 247
Magnetization (see *Lattices, two-dimensional decorated*) **110A** (1982) 339
Magnetization (see *Ferromagnet with paramagnetic fluctuations*) **110A** (1982) 518

Magnetization (see *Metamagnets*) **103A** (1980) 257
Magnetization, local
– Local magnetization of the semi-infinite *XY*-chain - Bariev **103A** (1980) 363
Magnons spectrum
– Theory of collinear metamagnetism. III. — by renormalized high density expansion - Onyszkiewicz **103A** (1980) 274
Many-body interactions (see *Kirkwood–Salsburg equations*) **105A** (1981) 286
Many-body system, classical (see *Test particle problems*) **105A** (1981) 365
Many-body system, classical (see *Test particle problems*) **105A** (1981) 380
Many-body theory (see *Green's functions, standard basis operator*) **108A** (1981) 180
Many-component spin systems
– Statistical mechanics of Z(M) models on Cayley trees - Moraal **105A** (1981) 472
Markovian approximation (see *Stochastic processes in channeling*) **105A** (1981) 229
Markovian master equation (see *Brownian motion of harmonic systems*) **105A** (1981) 445
Markovian master equations
– On the relations between — and stochastic differential equations - Hanggi et al. **107A** (1981) 143
Markovian processes
– WKB-type expansion for Langevin equations - Langouche et al. **101A** (1980) 301
Markov processes
– Induced quantum stochastic processes: a solvable example of a quantum system strongly coupled with a reservoir - Kosloff **110A** (1982) 346
Markov-processes (see *Delta-correlated cumulants*) **102A** (1980) 489
Markov processes, general (see *Critical dynamics*) **103A** (1980) 80
Markov processes, quasi
– Brownian motion and quasi-Markov processes - Marshall **103A** (1980) 172
Markov processes, quasi
– Brownian motion and quasi-Markov processes II - Marshall and Claverie **104A** (1980) 223
Markov processes, stochastic
– On the equivalence between Bernoulli dynamical systems and stochastic Markov processes - Courbage and Misra **104A** (1980) 359
Master equation, expansion of (see *Critical dynamics*) **103A** (1980) 55
Master equation, expansion of (see *Critical dynamics*) **103A** (1980) 80
Master equation near a nonequilibrium transition
– Asymptotic solution of the —: the stationary solutions - Lemarchand **101A** (1980) 518
Maxwell models (see *Boltzmann equations for internal state*) **101A** (1980) 375
Maxwell molecules
– Soluble Boltzmann equations for internal state and Maxwell models - Futcher et al. **101A** (1980) 185
Maxwell's equations at a dividing surface (see *Interfacial electromagnetic properties*) **102A** (1980) 105
Mayer–Montroll equations
– On the Kirkwood–Salsburg and — and their solutions for many-body interactions - Moraal **105A** (1981) 286
Mean field description (see *Systems of point particles in equilibrium*) **110A** (1982) 302
Mean-square displacement (see *Random walk*) **110A** (1982) 535
Mechanical oscillator
– Dissipative contributions of internal multiplicative noise I. — - Lindenberg and Seshadri **109A** (1981) 483

Meissner effect (see *Scattering in superconducting state*) **106A** (1981) 622
Melting transition (see *Defects in hard core statistical ensembles*) **109A** (1981) 58
Memory function equation approach (see *Kinetics of spinodal decomposition*) **110A** (1982) 188
Memory functions (see *Colloidal systems*) **105A** (1981) 552
Memory kernel (see *Time correlation functions*) **108A** (1981) 333
Memory kernels for a plasma (see *Kinetic theory of self-diffusion*) **104A** (1980) 25
Metals
– Finite temperature model-potential theory of — - Pelissier **105A** (1981) 607
Metamagnets
– Theory of collinear metamagnetism. I. Unified treatment of field- and temperature-induced — - Onyszkiewicz **103A** (1980) 226
– Theory of collinear metamagnetism. II. High density expansion method - Onyszkiewicz **103A** (1980) 257
– Theory of collinear metamagnetism. III. Magnons spectrum by renormalized high density expansion - Onyszkiewicz **103A** (1980) 274
Methane, liquid
– The density of the self-diffusion coefficient of liquid methane - Harris and Trappeniers **104A** (1980) 262
Methane, liquid and gaseous
– Measurements of the viscosity of compressed gaseous and liquid methane - Diller **104A** (1980) 417
Methane molecules
– The orientational relaxation of — in the solid phase II at low temperatures - Sprik and Trappeniers **103A** (1980) 411
Methane, solid
– The ordering phase transitions in solid methane and the cerium monochalcogenides compared. A test of universality - Sprik et al. **109A** (1981) 339
Methane, solid (see *Rotational kinetic energy*) **105A** (1981) 417
Mixed phase (see *Superconducting and ferromagnetic orderings*) **108A** (1981) 459
Mixture of classical particles (see *Chemical equilibria*) **104A** (1980) 435
Mixtures, nonideal
– Note on the reaction rate in non-ideal mixtures - Moreau **102A** (1980) 389
Mixtures of Ising and Heisenberg substances
– Critical temperature of inhomogeneous — - Pekalski and Ausloos **101A** (1980) 507
Mn_3GaC (see *Metamagnets*) **103A** (1980) 226
Mn_3GaC (see *Metamagnets*) **103A** (1980) 257
Mobility of kinks (see *Thermal kinks*) **108A** (1981) 257
Mode coupling theory
– — of higher order time correlation functions - Ronis **107A** (1981) 25
Model-potential theory
– Finite temperature — of metals - Pelissier **105A** (1981) 607
Mode–mode coupling
– Anomalous behaviour of the thermal conductivity, and the viscosity in the supercooled region as determined by — - Papon and Meijer **101A** (1980) 477
Mode–mode coupling approximation (see *Correlation functions, low-frequency*) . **110A** (1982) 201
Mode–mode coupling theory (see *Rotational diffusion*) **110A** (1982) 171
Molecular dynamics (see *Ionic systems*) **107A** (1981) 179
Molecular dynamics (see *Relative motions in atomic fluids*) **102A** (1980) 70
Molecular dynamics (see *Square-well fluid*) **104A** (1980) 243

Molecular dynamics (see *Square-well fluid*) **107A** (1981) 158
Molecular field approximation
– On two renormalised effective field theories - Fynbo **105A** (1981) 517
Molecular motion
– Hydrodynamics and —: a phenomenological approach - Evans and Grigolini ... **105A** (1981) 31
Momentum space renormalization (see *Sine–Gordon model*) **103A** (1980) 597
Mori formalism (see *Magnetic resonance saturation*) **103A** (1980) 295
Moving matter, hydrodynamically (see *Gravitation fields*) **104A** (1980) 210
m–6–8 potential (see *Fluid under shear*) **103A** (1980) 343
Muffin-tin model (see *Two-dimensional bandstructure*) **101A** (1980) 49
Muffing-tin orbitals
– An MTO theory for the calculation of deep levels in semiconductors due to a substitutional impurity cluster - Rotthier et al. **104A** (1980) 233
Multi-channel reactive scattering (see *Reaction–diffusion systems*) **101A** (1980) 289
Multicomponent alloys (see *Disordered crystal*) **107A** (1981) 567
Multiphoton processes (see *Two-level system interacting with EM field*) **108A** (1981) 305
Multiple light scattering (see *Depolarization of scattered light*) **101A** (1980) 431
Multiplicative noise
– Dissipative contributions of internal —. I. Mechanical oscillator - Lindenberg and Seshadri **109A** (1981) 483
Multivariate master equation
– Chapman–Enskog development of the — - Van den Broeck et al. **101A** (1980) 167

Navier–Stokes equation (see *Particle in solution, spherically symmetric*) **102A** (1980) 161
ND_3
– Theory of the Senftleben–Beenakker effects for NH_3 and —: collision integrals - Snider et al. **103A** (1980) 379
Nematic mesophase (see *Dielectric loss*) **108A** (1981) 135
Neon–argon mixtures
– Density dependence and composition dependence of the viscosity of neon–helium and — - Kestin et al. **106A** (1981) 415
Neon–deuterium mixture (see *Diffusion, Lorentzian*) **105A** (1981) 257
Neon–HD mixture (see *Diffusion, Lorentzian*) **105A** (1981) 264
Neon–helium mixtures
– Density dependence and composition dependence of the viscosity of neon–helium and neon–argon mixtures - Kestin et al. **106A** (1981) 415
Neon–hydrogen mixture (see *Diffusion, Lorentzian*) **105A** (1981) 245
Neon–xenon system
– Vapour–liquid and gas–gas equilibria in simple systems. VI. The critical exponents β_P and β_T of the system neon–xenon - Deerenberg et al. **103A** (1980) 183
Neon–xenon system (see *Vapour–liquid equilibria*) **101A** (1980) 459
Neutral particles (see *Hopping model*) **102A** (1980) 357
Neutrino gas, massive
– Volume viscosity of a massive neutrino gas - Calkoen and De Groot **110A** (1982) 222
Neutron diffraction, elastic magnetic (see *Magnetic scattering of neutrons*) **101A** (1980) 339
NH_3
– Theory of the Senftleben–Beenakker effects for — and ND_3: collision integrals - Snider et al. **103A** (1980) 379

Nitrogen–noble gas mixtures
– The thermal conductivity of mixtures of nitrogen with four noble gases at room temperature - Fleeter et al. **108A** (1981) 371
Nitrous oxide (see *Thermal conductivity*) **103A** (1980) 521
NMR spin echoes
– On the theory of — in solids - Tjon **108A** (1981) 27
Noble gas systems, binary (see *Thermal diffusion factors*) **108A** (1981) 488
Nonequilibrium distribution function (see *Nonlinear transport equations*) **109A** (1981) 425
Nonequilibrium molecular dynamics (see *Fluid under shear*) **103A** (1980) 343
Nonequilibrium open systems
– Statistical-dynamical theory of nonlinear stochastic processes. II. Time-convolutionless projector method in — - Tokuyama **109A** (1981) 128
Nonequilibrium systems
– Spatial correlations in —: the effect of diffusion - Medina-Noyola and Keizer .. **107A** (1981) 437
Nonequilibrium systems, sensitivity of
– Sensitivity of nonequilibrium systems - Kondepudi and Prigogine **107A** (1981) 1
Nonequilibrium thermodynamics
– Nonlinear fluctuation–dissipation relations and stochastic models in —. I. Generalized fluctuation - dissipation theorem - Bochkov and Kuzovlev **106A** (1981) 443
– Nonlinear fluctation - dissipation relations and stochastic models in —. II. Kinetic potential and variational principles for nonlinear irreversible processes - Bochkov and Kuzovlev **106A** (1981) 480
Nonequilibrium thermodynamics
– — of interfacial systems. II. Boundary conditions for fluids with spin - Kovac .. **107A** (1981) 280
Nonequilibrium thermodynamics (see *Interfacial fluid membrane*) **103A** (1980) 468
Nonequilibrium thermodynamics (see *Onsager–Machlup lagrangians*) **103A** (1980) 586
Non-equilibrium two-phase system
– Two and three-dimensional interfacial dynamics - Dumais **104A** (1980) 143
Nonideal plasmas
– Quantum-statistical conductance theory of — by use of the force–force correlation function method - Röpke et al. **101A** (1980) 243
Nonlinear conductivity (see *Nonlinear nonequilibrium response*) **109A** (1981) 251
Nonlinear dispersive waves
– Statistics of —. II. Multi-point velocity correlation-functions - Matsuno **104A** (1980) 71
Nonlinear dissipation (see *Brownian motion in Oseen's approximation*) **109A** (1981) 293
Nonlinear dynamical systems, two-dimensional
– The influence of external fluctuations on self-sustained temporal oscillations - Ebeling and Engel-Herbert **104A** (1980) 378
Nonlinear dynamics of fluctuations
– Low-frequency correlation functions in case of — - Morozov **110A** (1982) 210
Nonlinear hydrodynamic fluctuations
– — around equilibrium - Van Saarloos et al. **110A** (1982) 147
Nonlinear irreversible processes (see *Fluctuation–dissipation relations, nonlinear*) **106A** (1981) 480
Nonlinear kinetics
– Pattern formation in the Schlögl model of — - Dung and Kozak **108A** (1981) 63
Nonlinear Langevin type equations (see *Fluctuation theory*) **102A** (1980) 399
Nonlinear nonequilibrium response
– Theory of —. Application to the Esaki effect - Murayama **109A** (1981) 251

Nonlinear oscillator (see *Duffing nonlinear oscillator*) **104A** (1980) 495
Nonlinear oscillators (see *Stability of nonlinear oscillators*) **107A** (1981) 219
Nonlinear response theory
– Closed time path Green's functions and — - Hao **109A** (1981) 221
Nonlinear response theory (see *Nonlinear nonequilibrium response*) **109A** (1981) 251
Nonlinear Schrödinger equation
– Equation of motion for the Heisenberg spin chain - Quispel and Capel **110A** (1982) 41
Nonlinear Schrödinger equation (see *Continuum Heisenberg spin system*) **103A** (1980) 573
Nonlinear stochastic processes
– Statistical-dynamical theory of —. II. Time-convolutionless projector method in non-equilibrium open systems - Tokuyama **109A** (1981) 128
Nonlinear stochastic processes (see *Stochastic differential equations*) **103A** (1980) 630
Nonlinear systems (see *Fluctuations in nonlinear systems*) **104A** (1980) 480
Nonlinear systems with fluctuating potential parameters
– Stability properties of —. I. Nonlinear oscillators - Seshadri et al. **107A** (1981) 219
Nonlinear transport equations
– — in statistical mechanics - Brey et al. **109A** (1981) 425
Nonmagnetic impurity scattering (see *Scattering in a superconducting state*) **102A** (1980) 447
Non-Markovian statistics
– Hydrodynamics and molecular motion: a phenomenological approach - Evans and Grigolini **105A** (1981) 31
Nonspherical particles (see *Stochastic equations of motion*) **109A** (1981) 1
Non-stationary processes in lasers
– — - Pokrovsky **105A** (1981) 105
Nonstationary wave functions (see *Harmonic oscillator, damped time-dependent*) **103A** (1980) 35
Nonsubstitutional impurity cluster
– An MTO theory for the calculation of deep levels in semiconductors due to a — - Rotthier et al. **108A** (1981) 622
Nonuniform fluids (see *Cluster expansion for fluids*) **102A** (1980) 145
n-particle distribution functions (see *Linear chain, classical*) **108A** (1981) 169
Nuclear magnetic resonance (see *PVT data for ethylene*) **104A** (1980) 255
Nuclear magnetic resonance (see *Rotational Brownian motion*) **102A** (1980) 539
Nuclear magnetic resonance (see *Self-diffusion*) **104A** (1980) 262
Nucleation theory (see *Sine–Gordon chain*) **108A** (1981) 257
n-vector model
– Exact solution of the impure one-dimensional — with bilinear and biquadratic exchange interactions - Knezević and Milosević **107A** (1981) 255

Oguchi model (see *Cluster Ising models*) **108A** (1981) 473
One-component plasma
– Magnetic properties of a nearly classical — in three or two dimensions - Alastuey and Jancovici **102A** (1980) 327
One-component plasma, overdamped (see *Colloidal systems*) **105A** (1981) 552
One-dimensional chain
– Random walk on a random walk - Kehr and Kutner **110A** (1982) 535
One-dimensional hard sphere gas
– The exact solution of an elimination problem in kinetic theory. I. The — - Evans **102A** (1980) 87

One-dimensional Ising chain kinetics
– Kinetics of the Ising magnet. II. One-dimensional model - Berim and Kessel **101A** (1980) 127
One-dimensional Ising model (see *Kinetics of the Ising magnet*) **105A** (1981) 187
One-dimensional Ising system
– Exact approach to equilibrium for the Glauber model of a — with random $\pm J$ bonds - Falk **104A** (1980) 475
One-fluid theory
– The derivatives along the critical line in a binary mixture near the critical points of pure components in — - Wielopolski **109A** (1981) 265
One-particle relaxation (see *One-dimensional Ising chain kinetics*) **101A** (1980) 127
Onsager–Machlup formalism (see *Heat flux*) **104A** (1980) 320
Onsager–Machlup Lagrangian
– Covariant Lagrangian of Onsager and Machlup without discretization - Zambrini **102A** (1980) 496
Onsager–Machlup lagrangian
– On the path integral for diffusion in curved spaces - Dekker **103A** (1980) 586
Onsager method (see *Liquid–crystalline transition*) **108A** (1981) 546
Onsager model, dynamical
– A dynamical Onsager model approach of field fluctuations and light scattering in a gas of isotope molecules - Thibeau et al. **105A** (1981) 219
Onsager relations (see *Thermal fluctuations*) **109A** (1981) 208
Onsager's reciprocal relations
– On transformations of internal vectorial variables in the thermodynamic theory of dielectric relaxation and the invariance of — - Van Veenendaal and Kluitenberg **109A** (1981) 123
Optical response (see *Jahn–Teller effect in crystals*) **110A** (1982) 451
Order–disorder phase transitions (see *Shear viscosity, dynamic*) **108A** (1981) 441
Ordering phase transitions
– The — in solid methane and the cerium monochalcogenides compared. A test of universality - Sprik et al. **109A** (1981) 339
Orientational ordering
– Liquid–crystalline ordering in the solution of long persistent chains - Khokhlov and Semenov **108A** (1981) 546
Orientational transitions
– — in a dimer system - Kaye **105A** (1981) 347
Ornstein–Zernike effect (see *Depolarization of light*) **103A** (1980) 455
Ornstein–Zernike equation
– Simple variational method for the closures of the —: A study of liquid instability - Vicsek **102A** (1980) 523
Ornstein–Zernike equation (see *Fluctuation–dissipation theory*) **107A** (1981) 437
Oscillations (see *Self-sustained oscillations*) **104A** (1980) 378
Oscillator (see *Itinerant oscillator model*) **102A** (1980) 547
Oscillator in external force (see *Brownian motion of an oscillator*) **110A** (1982) 321
Oscillators, stochastic anharmonic (see *Stability of nonlinear oscillators*) **107A** (1981) 219
Oseen theory, generalized
– A generalized Oseen theory of two-dimensional Brownian motion - Varley **108A** (1981) 417
Osmotic coefficient (see *Electrolytes, anomalous*) **110A** (1982) 617

Pair correlation function (see *Coulomb gas, two-dimensional*) **107A** (1981) 241

Pair correlation function (see *Yvon–Born–Green equation in critical region*) **109A** (1981) 382
Para-Bose oscillators
– Jahn–Teller systems as displaced — - Schmutz **101A** (1980) 1
Paramagnetic state (see *Random bond Ising model*) **104A** (1980) 397
Particle in solution, spherically symmetric
– Force multipole moments for a spherically symmetric particle in solution - Schmitz **102A** (1980) 161
Particle–phonon interaction (see *Electron–hole plasma, inhomogeneous*) **109A** (1981) 161
Particles on a ring
– Three — - Rabouw and Ruijgrok **109A** (1981) 500
Particle with spin in external field
– Classical relativistic equations for particles with spin moving in external fields - Van Dam and Ruijgrok **104A** (1980) 281
Path integral (see *Fokker–Planck equation*) **101A** (1980) 283
Path integrals (see *Onsager–Machlup lagrangians*) **103A** (1980) 586
Path integrals, constrained (see *Aharonov–Bohm effect*) **109A** (1981) 609
Pattern formation (see *Nonlinear kinetics*) **108A** (1981) 63
Peierls chain (see *Antiferromagnetic lattices*) **104A** (1980) 298
Percolation problem
– The problem of directed percolation - Obukhov **101A** (1980) 145
Percus–Yevick equation
– Critical point scaling in the — - Fishman and Fisher **108A** (1981) 1
Perturbation theories
– — for quadrupolar fluids - Lee et al. **110A** (1982) 235
Perturbation theory for quantum fluids
– — at high temperature - Kumar and Giri **104A** (1980) 339
Pfaffion method (see *Ising model, three-dimensional*) **107A** (1981) 464
Phase boundaries (see *Ising antiferromagnet, triangular*) **108A** (1981) 531
Phase diagram of water
– — based on a lattice model - Meijer et al. **109A** (1981) 365
Phase diagrams (see *Metamagnets*) **103A** (1980) 226
Phase diagrams (see *Schofield's linear model*) **105A** (1981) 53
Phase diagrams (see *Z(M) models*) **105A** (1981) 472
Phase probabilities (see *Heterophase fluctuations*) **108A** (1981) 402
Phase-space dynamics (see *Harmonic oscillator, time-dependent*) **107A** (1981) 553
Phase transition (see *Dicke model*) **103A** (1980) 213
Phase transition (see *Ferromagnet with paramagnetic fluctuations*) **110A** (1982) 518
Phase transition (see *Planar rotator model*) **102A** (1980) 255
Phase transitions (see *Heterophase fluctuations*) **108A** (1981) 402
Phase transitions (see *Heterophase system*) **110A** (1982) 247
Phase transitions, second-order
– Second-order phase transitions in triangular Ising models with two- and three-spin interactions - Dóczi-Réger and Hemmer **109A** (1981) 541
Phase transition temperature (see *Random bond Ising model*) **107A** (1981) 360
Phase transition (see *Two-dimensional Coulomb gas*) **104A** (1980) 447
Phase velocity (see *Acoustic waves, linear transversal*) **110A** (1982) 361
Phonon fields (see *Quantum field theory of crystals*) **110A** (1982) 257
Phonon relaxation function (see *Hydrogen-bonded ferroelectrics*) **107A** (1981) 201
Phonon scattering (see *Scattering in a superconducting state*) **102A** (1980) 447

Photon density–density correlations
– — spectrum of a three-level atom at high photon densities - Mavroyannis **105A** (1981) 203
Photon noise (see *Emission noise*) **108A** (1981) 511
Pinning potential (see *Interface between two phases*) **107A** (1981) 319
Planar rotator model
– Theory of defect states in the two-dimensional — with long-range interaction - Holz **102A** (1980) 255
Planar rotator model (see *Z(M) models*) **105A** (1981) 472
Plasma (see *Boltzmann-theory, relativistic*) **101A** (1980) 205
Plasma (see *One-component plasma*) **102A** (1980) 327
Plasma, one-component
– Kinetic theory of self-diffusion in a moderately dense one-component plasma - Suttorp **104A** (1980) 25
Plasma oscillations
– Motions of particles in an oscillating plasma - Gordeyev **109A** (1981) 465
Plasmas, hot dilute
– On the equivalence of convergent kinetic equations for hot dilute plasmas. I. Transport coefficients in first Chapman–Cowling approximation - Cohen and Suttorp **110A** (1982) 81
Plasma, two-dimensional one-component
– Magnetic properties of a nearly classical one-component plasma in two dimensions. III. Strong field revisited - Alastuey **110A** (1982) 293
Plasma, weakly ionized
– Anomalous heat conductivity for a weakly ionized plasma on a strong magnetic field - Kagermann and Köhler **102A** (1980) 344
Poincaré oscillator (see *Self-sustained oscillations*) **104A** (1980) 378
Point imperfection
– On the local density of states for an extended isolated — - A Green function method - Rotthier et al. **103A** (1980) 205
Polarisability, anisotropy of
– Internal field correction in far-infrared absorption of highly polar liquids - Bossis **110A** (1982) 408
Polarizability (see *Stockmayer fluids*) **108A** (1981) 14
Polarizable fluid
– On anisotropy of the pressure tensor and the force density for a — in an electromagnetic field - Suttorp and De Groot **108A** (1981) 361
Polarization
– On vectorial internal variables and dielectric and magnetic relaxation phenomena - Kluitenberg **109A** (1981) 91
Polar liquids
– Internal field correction in far-infrared absorption of highly — - Bossis **110A** (1982) 408
Polar liquids (see *Stockmayer fluids*) **102A** (1980) 1
Polar molecule in nonuniform electric field
– On the average moments of a — - Adu-Gyamfi **108A** (1981) 205
Polyatomic gases
– Thermodynamical theory of boundary conditions for — - Halbritter and Waldmann **104A** (1980) 1
Poly-atomic gas mixtures
– Kinetic modeling of — - Philippi **105A** (1981) 147

Polymer chain collapse
– Theory of the — for the *d*-dimensional case - Khokhlov **105A** (1981) 357
Polymer entanglements (see *Aharonov–Bohm effect*) **109A** (1981) 609
Polymer–fluid interaction
– Long time tail in the diffusion of a spherical polymer - Jones **101A** (1980) 389
Polymer, spherical (see *Diffusion of spherical polymer*) **101A** (1980) 389
Polymer, spherically symmetric (see *Particle in solution, spherically symmetric*) .. **102A** (1980) 161
Positional correlation function (see *Defects in hard core statistical ensembles*) **109A** (1981) 58
Potassium (see *Model-potential theory*) **105A** (1981) 607
Potts model
– Finite size scaling and critical point exponents of the — (*Letter to the Editor*) - Nightingale and Blöte **104A** (1980) 352
Potts model (see *Z(M) models*) **105A** (1981) 472
Pressure (see *Electrolytes, anomalous*) **110A** (1982) 617
Pressure inequalities in quantum statistics
– — - Liboff **106A** (1981) 603
Pressure tensor (see *Polarizable fluid*) **108A** (1981) 361
Product property of distribution functions
– On the — in classical statistical mechanics - Moraal **105A** (1981) 303
Propagating modes
– The number of — in hydrodynamic systems - Goldhirsch and Procaccia **105A** (1981) 330
Propagation of acoustic waves (see *Acoustic waves, linear transversal*) **110A** (1982) 361
Proton–lattice interaction
– Dynamics of — in hydrogen-bonded ferroelectrics - Cheung **107A** (1981) 201
Provotorov theory (see *Magnetic resonance saturation*) **103A** (1980) 295
Pseudospin–phonon interactions (see *Hydrogen bonded ferroelectrics*) **102A** (1980) 554
Pure phase dynamics (see *Weiss–Ising model, quantum-mechanical*) **108A** (1981) 107
Pure state condition
– — for the semi-classical Wigner function - Ozorio de Almeida **110A** (1982) 501
PVT data for ethylene
– Low temperature — by an NMR method - Trappeniers and Arends **104A** (1980) 255

Quadratic Hamiltonians
– Canonical forms for — - Broadbridge and Hurst **108A** (1981) 39
Quadrupolar fluids
– Perturbation theories for — - Lee et al. **110A** (1982) 235
Quadrupolar interaction (see *NMR spin echoes*) **108A** (1981) 27
Quantal fluctuation (see *Harmonic oscillator, damped time-dependent*) **103A** (1980) 35
Quantum field theory of crystals
– A —. I. - Kitamura **110A** (1982) 257
– A —. II. - Kitamura **110A** (1982) 270
– A —. III. A two-band model in one-dimensional fermion systems - Kitamura **110A** (1982) 282
Quantum fluid (see *Time correlation functions*) **108A** (1981) 333
Quantum fluids (see *Perturbation theory for quantum fluids*) **104A** (1980) 339
Quantum fluids (see *Thermodynamic perturbation theory*) **110A** (1982) 565
Quantum friction
– — in phase space - Jannussis et al. **102A** (1980) 561

Quantum friction
– — in a periodic potential - Jannussis et al. **106A** (1981) 611
Quantum inverse method (see *Schrödinger model, n-component nonlinear*) **107A** (1981) 423
Quantum kinetic equations
– — in systems with bound states - Klimontovich and Kremp **109A** (1981) 517
Quantum logics
– — and chemical kinetics - Ivanov **107A** (1981) 341
Quantum l/f noise (see *Emission noise*) **108A** (1981) 511
Quantum projection renormalization group
– — study of a spin 1 Ising model: universality - Hu **109A** (1981) 352
Quantum statistics (see *Pressure inequalities in quantum statistics*) **106A** (1981) 603
Quantum statistics of light field
– Quantum statistics of field after double-beam two-photon absorption - Carusotto **107A** (1981) 509
Quantum systems strongly coupled with reservoir (see *Induced quantum stochastic processes*) **110A** (1982) 346
Quasi-one dimensional conductors (see *Thermal kinks*) **108A** (1981) 257
Quasiparticles in a superconductor (see *Superconductivity*) **107A** (1981) 330
Quasiprobability distribution function (see *Non-stationary processes in lasers*) **105A** (1981) 105
Quenched systems (see *Mixtures of Ising and Heisenberg substances*) **101A** (1980) 507

Radial distribution function
– Quantum perturbations to the — of a hard-sphere fluid - Giri and Kumar **105A** (1981) 601
Radial oscillations of a plasma (see *Ionic sound oscillations*) **105A** (1981) 313
Radiation transfer theory
– A derivation of the — for random media - Diener **106A** (1981) 398
Radiative balance in Brownian motion
– Brownian motion and quasi-Markov processes II - Marshall and Claverie **104A** (1980) 223
Radiative decay of Wannier excitons
– — in thin crystal films - Liu and Lee **102A** (1980) 131
Raman lines, rotational
– The broadening and shift of the rotational Raman lines for hydrogen isotopes at low temperatures - Van den Hout et al. **104A** (1980) 509
Random bond Ising model
– Real space renormalization group study of the — - Schwartz and Fishman **104A** (1980) 115
– Effect of the frustration to the ground state energy and entropy of the spin-glass in the — on the square lattice - Katsura and Nagahara **104A** (1980) 397
Random bond Ising model
– On the Bethe approximation for the — - Horiguchi **107A** (1981) 360
Random bonds (see *One-dimensional Ising system*) **104A** (1980) 475
Random field singularities (see *Renormalization transformations*) **108A** (1981) 211
Random Ising model (see *Entropy of the spin-glass state*) **104A** (1980) 333
Random Ising model on the Cayley tree
– Thermodynamic limit for the distribution function of the effective field of random Ising models on the linear chain or on the Cayley tree - Morita **103A** (1980) 354
Random Ising model on the linear chain
– Thermodynamic limit for the distribution function of the effective field of — or on the Cayley tree - Morita **103A** (1980) 354
Random media (see *Radiation transfer theory*) **106A** (1981) 398

Random processes
– Analogs of renormalization group transformations in — - Shlesinger and Hughes **109A** (1981) 597
Random walk
– — on a — - Kehr and Kutner **110A** (1982) 535
Rarefied plasma in strong magnetic field (see *Plasma oscillations*) **109A** (1981) 465
Rate coefficient (see *Ion–molecule reactions*) **101A** (1980) 265
Rate equation method (see *Variational principle*) **105A** (1981) 631
Rate processes
– — in condensed media: basic equations - Fain **101A** (1980) 67
Rate processes in solids
– Further development of the kinetic many-body concept of large energy fluctuations and — - Khait **103A** (1980) 1
Rate theory
– On the — for thermal soliton generation - Wonneberger **103A** (1980) 543
Rayleigh–Binard instability (see *Hydrodynamic fluctuations*) **102A** (1980) 399
Rayleigh line (see *Light scattering from a fluid*) **107A** (1981) 491
Rayleigh line, depolarized
– The broadening of the depolarized Rayleigh line for hydrogen isotopes at low temperatures - Van den Hout et al. **104A** (1980) 548
Reaction diffusion systems
– Chapman–Enskog development of the multivariate master equation - Van den Broeck et al. **101A** (1980) 167
– Quantum statistics — - Ivanov **101A** (1980) 289
Reaction field approximation
– On two renormalised effective field theories - Fynbo **105A** (1981) 517
Reaction rate (see *Chemical reaction*) **102A** (1980) 389
Reaction rate coefficients (see *Chemical kinetics*) **107A** (1981) 341
Reaction-rate coefficients (see *Reaction-diffusion systems*) **101A** (1980) 289
Real space renormalization (see *Ising model with vacancies*) **108A** (1981) 589
Real space renormalization (see *Random bond Ising model*) **104A** (1980) 115
Real space renormalization group (see *Spin 1/2 XY model*) **107A** (1981) 431
Reflection (see *Crystalline slab with complex polarisability*) **107A** (1981) 471
Relative motions in atomic fluids
– —: a molecular dynamics investigation - Balucani and Vallauri **102A** (1980) 70
Relativistic Green matrix method (see *Two-dimensional bandstructure*) **101A** (1980) 49
Relativistic kinetic theory
– Relativistic Boltzmann-theory for a plasma. V. Reduction of the collision integrals - Van Erkelens and Van Leeuwen **101A** (1980) 205
Relativistic kinetic theory (see *Neutrino gas, massive*) **110A** (1982) 222
Relativistic multicomponent gas
– Entropy production in a — - Ekiel-Jezewska **109A** (1981) 278
Relativistic thermodynamical forces (see *Relativistic multicomponent gas*) **109A** (1981) 278
Relaxation cross sections (see *Senftleben–Beenakker effects*) **103A** (1980) 379
Relaxation in spin systems
– Kinetic theory of resonance and —. I. Kinetic equations for two-level open systems - Luczka **101A** (1980) 552
Relaxation near the instability point
– The variational theory and rate equation method with applications to — -

Suzuki et al. **105A** (1981) 631
Relaxation, orientational (see *Methane molecules*) **103A** (1980) 411
Relaxation phenomena, mechanical (see *Acoustic waves, linear transversal*) **110A** (1982) 361
Relaxation processes
– Rate processes in condensed media: basic equations - Fain **101A** (1980) 67
Renormalization group transformations
– Analogs of — in random processes - Shlesinger and Hughes **109A** (1981) 597
Renormalization transformations
– Random field singularities in renormalization group transformations on Van der Waals–Ising models - Stella **108A** (1981) 211
Rescaled occupation number representation
– — and the λ-transition - Lee **104A** (1980) 189
Resonance fluorescence
– Cooperative and interference effects in the — of two identical three-level atoms at high photon densities - Mavroyannis **110A** (1982) 431
Resonance in spin systems
– Kinetic theory of resonance and relaxation in spin systems. I. Kinetic equation for two-level open systems - Luczka **101A** (1980) 552
Response function (see *Electron–phonon system*) **102A** (1980) 22
Rigid rotator (see *Stochastic electrodynamics*) **109A** (1981) 178
Ripples on a fluid surface
– Ripples on the surface of a two-component fluid - Ogale et al. **110A** (1982) 593
Rocard relation, modified (see *Complex permittivity*) **105A** (1981) 593
Rotational Brownian motion
– Spectral densities of spherical harmonics for — - McConnell **102A** (1980) 539
Rotational degree of freedom (see *Diffusion, Lorentzian*) **105A** (1981) 245
Rotational diffusion
– — of a spheroidal Brownian particle - Aizenbud and Oppenheim **110A** (1982) 171
Rotational kinetic energy
– The — in the orientationally disordered phase of solid methane. A quasi-classical approach - Sprik and Trappeniers **105A** (1981) 417
Rotational relaxation (see *Thermal conductivity*) **103A** (1980) 521
Rototranslation
– Hydrodynamics and molecular motion: a phenomenological approach - Evans and Grigolini **105A** (1981) 31
Roughening transition (see *Interface between two phases*) **107A** (1981) 319

Saturation (see *Magnetic resonance saturation*) **103A** (1980) 295
Scaling function (see *XY-chain, semi-infinite*) **103A** (1980) 363
Scaling of equation of state (see *Critical point scaling*) **108A** (1981) 1
Scaling theory (see *Laser radiation, WKB treatment*) **107A** (1981) 71
Scattered light (see *Depolarization of scattered light*) **101A** (1980) 431
Scattering by multicomponent systems
– Contrasts in multicomponent systems - Des Cloizeau and Jannink **102A** (1980) 120
Scattering cross section (see *Scattering by multicomponent systems*) **102A** (1980) 120
Scattering in a superconducting state
– Theory of — - Murayama **102A** (1980) 447
Scattering in superconducting state
– Remarks on "Theory of —" - Murayama **106A** (1981) 622

Scattering, multiple
– Investigation of multiple scattering contributions to the depolarization of light scattered by xenon and carbon dioxide in the critical region - Trappeniers et al. **103A** (1980) 455
Schlögl model
– Asymptotic solution of the master equation near a nonequilibrium transition: the stationary solutions - Lemarchand **101A** (1980) 518
– Transition time statistics in simple bi-state chemical systems - Gillespie **101A** (1980) 535
Schlögl model
– Pattern formation in the — of nonlinear kinetics - Dung and Kozak **108A** (1981) 63
Schlögl model (see *Multivariate master equation*) **101A** (1980) 167
Schofield's linear model
– Critical-exponent renormalization, first-order transitions and demagnetizing effects for — - Den Ouden et al. **105A** (1981) 53
Schrödinger equation
– A microscopic theory of vortices in superfluid helium - Ichiyanagi **107A** (1981) 371
Schrödinger equation (see *Quantum friction*) **106A** (1981) 611
Schrödinger-like description (see *Onsager-Machlup Lagrangian*) **102A** (1980) 496
Schrödinger model, n-component nonlinear
– Correlation function for *n*-species of one-dimensional impenetrable bosons - Ottinger **107A** (1981) 423
Second virial coefficient (see *Bound states for nondegenerate quantum systems*) .. **109A** (1981) 531
Self-avoiding walks
– Renormalization of — on the square lattice - Malakis **104A** (1980) 427
Self-catalytic chemical reaction
– Note on the stochastic theory of a —. I - Dambrine and Moreau **106A** (1981) 559
– Note on the stochastic theory of a —. II - Dambrine and Moreau **106A** (1981) 574
Self-diffusion
– The density of the — coefficient of liquid methane - Harris and Trappeniers **104A** (1980) 262
Self-diffusion
– Dynamical properties of colloidal systems. III. Collective and — of interacting charged particles - Hess and Klein **105A** (1981) 552
Self-diffusion (see *Brownian particles, strongly interacting*) **110A** (1982) 606
Self-diffusion (see *Ethylene*) **107A** (1981) 307
Self-diffusion (see *Kinetic theory of self-diffusion*) **104A** (1980) 25
Self-diffusion in 1-dimensional lattice gas (see *Random walk*) **110A** (1982) 535
Self-sustained oscillations
– The influence of external fluctuations on self-sustained temporal oscillations - Ebeling and Engel-Herbert **104A** (1980) 378
Semiclassical distribution functions (see *Harmonic oscillator, time-dependent*) ... **107A** (1981) 553
Semiconductors, deep levels in
– An MTO theory for the calculation of deep levels in semiconductors due to a substitutional impurity cluster - Rotthier et al. **104A** (1980) 233
Semiconductors, deep levels in (see *Nonsubstitutional impurity cluster*) **108A** (1981) 622
Semipermeable membrane (see *Interfacial fluid membrane*) **103A** (1980) 468
Senftleben–Beenakker effect
– On the — on the thermal conductivity - Thijsse et al. **102A** (1980) 281
Senftleben–Beenakker effect
– The thermal conductivity of the gaseous mixture CH_3CN–Ar in a magnetic

field - Thijsse et al. **102A** (1980) 298
Senftleben–Beenakker effect (see *Ammonia*) **102A** (1980) 305
Senftleben–Beenakker effects
– Theory of the — for NH_3 and ND_3: collision integrals - Snider et al. **103A** (1980) 379
Senftleben–Beenakker effects (see *Knudsen gas, molecular*) **104A** (1980) 95
Separable interactions (see *Liquid ^{3}He*) **106A** (1981) 369
Shear flow
– Thermodynamic fluctuation theory for — - Evans and Hanley **108A** (1981) 567
Shear viscosity (see *Ethane, liquid*) **108A** (1981) 143
Shear viscosity, dynamic
– Dynamical properties of strongly interacting Brownian particles. I. Dynamic shear viscosity - Ohtsuki **108A** (1981) 441
Similarity solutions (see *Heisenberg continuum spin systems*) **107A** (1981) 533
Sine–Gordon chain
– On life time and mobility of thermal sine–Gordon kinks - Wonneberger **108A** (1981) 257
Sine–Gordon equation
– Equation of motion for the Heisenberg spin chain - Quispel and Capel **110A** (1982) 41
Sine–Gordon equation (see *Continuum Heisenberg spin system*) **103A** (1980) 573
Sine–Gordon kink pairs (see *Thermal soliton generation*) **103A** (1980) 543
Sine–Gordon model
– Momentum space renormalization for the — - Knops and Den Ouden **103A** (1980) 597
Single occupancy model (see *Defects in hard core statistical ensembles*) **109A** (1981) 58
Single oscillator model (see *Crystalline slab with complex polarisability*) **107A** (1981) 471
Sodium (see *Model-potential theory*) **105A** (1981) 607
Soft-core molecules
– Reexamination of Van der Waals model for — - Ree **104A** (1980) 197
Solid formation (see *Liquid phase instability criterion*) **109A** (1981) 357
Solid phase II (see *Methane molecules*) **103A** (1980) 411
Solids (see *Energy fluctuations in solids*) **103A** (1980) 1
Soliton (see *Thermal soliton generation*) **103A** (1980) 543
Solitons
– — on pseudo one-dimensional hydrogen bonded ferroelelectrics - Stamenković and Žakula **102A** (1980) 554
Solitons (see *Continuum Heisenberg spin system*) **103A** (1980) 573
Soliton transformation
– On the possibility of the transformation of a soliton into the bound state of two excitons due to the exciton - photon interaction - Satarić and Žakula **110A** (1982) 580
Spatial correlations
– — in nonequilibrium systems: the effect of diffusion - Medina-Noyola and Keizer **107A** (1981) 437
Specific heat (see *Anderson model, periodic*) **110A** (1982) 624
Specific heat (see *Ferromagnet with paramagnetic fluctuations*) **110A** (1982) 518
Specific heat (see *Hubbard model, one-dimensional*) **109A** (1981) 618
Specific heat (see *Spin systems, one- and two-dimensional*) **105A** (1981) 493
Specific heat (see *Two-dimensional electron gas*) **103A** (1980) 621
Specific heat of diluted magnet (see *n-vector model*) **107A** (1981) 255
Spectral densities of spherical harmonics (see *Rotational Brownian motion*) **102A** (1980) 539
Spectral functions (see *Excitation spectrum*) **110A** (1982) 431

Spheroidal Brownian particle
– Rotational diffusion of a — - Aizenbud and Oppenheim **110A** (1982) 171
Spin arrangements in magnetic crystals
– Wreath groups - Litvin **101A** (1980) 339
Spin chains (see *Heisenberg continuum spin systems*) **107A** (1981) 533
Spin dynamics (see *Heisenberg spin chain*) **110A** (1982) 41
Spin echoes (see *NMR spin echoes*) **108A** (1981) 27
Spin-glass
– Effect of the frustration to the ground state energy and entropy of the — in the random bond Ising model on the square lattice - Katsura and Nagahara **104A** (1980) 397
Spin-glass state (see *Entropy of the spin-glass state*) **104A** (1980) 333
Spin 1 Ising model
– Quantum projection renormalization group study of a —: universality - Hu **109A** (1981) 352
Spin–lattice relaxation (see *Methane molecules*) **103A** (1980) 411
Spin–lattice relaxation (see *Rotational Brownian motion*) **102A** (1980) 539
Spinning particle in electromagnetic field (see *Particle with spin in external field*) .. **104A** (1980) 281
Spinning particle in scalar field (see *Particle with spin in external field*) **104A** (1980) 281
Spinodal decomposition (see *Kinetics of spinodal decomposition*) **110A** (1982) 188
Spinodal decomposition (see *Fluctuations during spinodal decomposition*) **103A** (1980) 99
Spin relaxation function (see *Hydrogen-bonded ferroelectrics*) **107A** (1981) 201
Spin systems, one- and two-dimensional
– A new method for calculation of the magnetic properties in one- and two-dimensional spin systems with anisotropic Heisenberg exchange - Tanaka and Uryû **105A** (1981) 493
Spin temperature (see *Magnetic resonance saturation*) **103A** (1980) 295
Spin 1/2 XY model
– Critical exponents for the two dimensional — from a seven spin cell real space renormalization group calculation - Rogiers and Reynaert **107A** (1981) 431
Square lattice (see *Antiferromagnetic lattices*) **104A** (1980) 298
Square lattice (see *Self-avoiding walks*) **104A** (1980) 427
Square-well fluid
– Molecular dynamical calculations of the transport properties of a —. I. The viscosity below critical density - Michels and Trappeniers **101A** (1980) 156
Square-well fluid
– Molecular dynamical calculations on the transport properties of a —. II. The viscosity above the critical density - Michels and Trappeniers **104A** (1980) 243
Square-well fluid
– Molecular dynamical calculations on the transport properties of a —. III. The thermal conductivity - Michels and Trappeniers **107A** (1981) 158
– Molecular dynamical calculations on the transport properties of a —. IV. The influence of the well-width on the viscosity and the thermal conductivity - Michels and Trappeniers **107A** (1981) 299
Stability (see *Liquid drops, charged*) **101A** (1980) 223
Stability of inhomogeneous stationary states (see *Superconducting microbridge*) **105A** (1981) 1
Stability of nonlinear oscillators
– Stability properties of nonlinear systems with fluctuating parameters. I. Nonlinear oscillators - Seshadri et al. **107A** (1981) 219
Stationary solutions (see *Schlögl model*) **101A** (1980) 518

Statistical mechanical concepts (see *Grand unified theories*) **110A** (1982) 1
Statistical mechanical model with chemical reaction
– — - Høye and Olaussen **104A** (1980) 435
Step-by-step chemical reaction (see *Self-catalytic chemical reaction*) **106A** (1981) 574
Step repulsive barrier (see *Gas of hard spheres*) **101A** (1980) 351
Stochastic differential equations
– Comment on the difference between Langevin and Ito theories of — - Pick (*Letter to the Editor*) **103A** (1980) 630
Stochastic differential equations
– On the relations between Markovian master equations and — - Hanggi et al. **107A** (1981) 143
Stochastic differential equations (see *Test particle problems*) **105A** (1981) 365
Stochastic differential equations (see *Test particle problems*) **105A** (1981) 380
Stochastic electrodynamics
– Linear response of stochastic multiperiodic systems in stationary states with application to — - Denis et al. **109A** (1981) 178
Stochastic equations of motion
– — for nonspherical particles - Kagermann **109A** (1981) 1
Stochastic fluid equations of motion
– Hydrodynamic fluctuation forces - Jones **105A** (1981) 395
Stochastic formulation (see *Itinerant oscillator model*) **102A** (1980) 547
Stochastic Liouville equation
– Brownian motion and quasi-Markov processes - Marshall **103A** (1980) 172
Stochastic Liouville equation (see *Differential equations, inhomogeneous linear random*) **109A** (1981) 23
Stochastic one-variable system
– Growth of fluctuations from a marginal equilibrium - Caroli et al. **101A** (1980) 581
Stochastic processes (see *Nonlinear stochastic processes*) **109A** (1981) 128
Stochastic processes (see *Test particle problems*) **105A** (1981) 365
Stochastic processes in channeling
– — - Gavrilenko and Fedyanin **105A** (1981) 229
Stochastic theory of self-catalytic reactions (see *Self-catalytic chemical reaction*) **106A** (1981) 559
Stochastic theory of self-catalytic reactions (see *Self-catalytic chemical reaction*) **106A** (1981) 574
Stockmayer fluids
– Static dielectric properties of — - Pollock and Alder **102A** (1980) 1
Stockmayer fluids
– Static dielectric properties of polarizable — - Pollock et al. **108A** (1981) 14
Stress tensor, asymmetric
– On the asymmetry of the stress tensor of materials with internal degrees of freedom - Oevel and Schröter **105A** (1981) 169
Structure factor (see *Fluctuation during spinodal decomposition*) **103A** (1980) 99
Substitutional impurity cluster
– An MTO-scheme for the calculation of the influence of a — on the density of states within the energy bands - Rotthier et al. **108A** (1981) 613
Substitutional impurity cluster (see *Semiconductors, deep levels in*) **104A** (1980) 233
Superconducting and ferromagnetic orderings
– Bicritical and tetracritical behaviour in a model with — - Brankov and Tonchev **108A** (1981) 459

Superconducting microbridge
– Stability of inhomogeneous stationary states for the hot-spot model of a — - Bedeaux and Mazur **105A** (1981) 1
Superconducting state (see *Scattering in a superconducting state*) **102A** (1980) 447
Superconducting state (see *Scattering in superconducting state*) **106A** (1981) 622
Superconductivity
– On coexistence of — and ferromagnetism - Bogolubov Jr. et al. **101A** (1980) 613
Superconductivity
– On quasiclassical methods in — - Lozovik and Akopov **107A** (1981) 330
Superconductivity, nonequilibrium (see *Cooper coupling of electrons*) **105A** (1981) 86
Superconductor, spatially inhomogeneous (see *Superconductivity*) **107A** (1981) 330
Supercooled liquid
– Anomalous behaviour of the thermal conductivity and the viscosity in the supercooled region as determined by mode–mode coupling - Papon and Meijer **101A** (1980) 477
Superfluid helium
– A microscopic theory of vortices in — - Ichiyanagi **107A** (1981) 371
Superfluid phases (see *Liquid ^{3}He*) **106A** (1981) 369
Surface balance equation
– Two and three-dimensional interfacial dynamics - Dumais **104A** (1980) 143
Surface currents (see *Diamagnetism of an electron gas*) **101A** (1980) 324
Surface of crystalline dielectric
– Local fields near the — - Lekner and Castle **101A** (1980) 89
Surface scattering (see *Knudsen gas, molecular*) **104A** (1980) 95
Surface states
– A relativistic Green matrix method to calculate the — in a three-dimensional crystal slab - Dhoore and Phariseau **101A** (1980) 49
Surface stress tensor (see *Surface balance equation*) **104A** (1980) 143
Surface tension
– Noncritical interface near a critical end point II - Ramos-Gómez and Widom ... **104A** (1980) 595
Surface tension (see *Fluid–fluid interface*) **107A** (1981) 91
Susceptibility, electric and magnetic
– Electric and magnetic susceptibilities for a fluid–fluid interface; the ellipsometric coefficient - Zielinska et al. **107A** (1981) 91
Suspension (see *Colloidal suspensions*) **103A** (1980) 325
Symmetry-adapted linear combinations for a finite group
– A new method of constructing —. I. SALC's of equivalent invariant functions - Kim **105A** (1981) 577
Symmetry-adapted linear combinations for a finite group
– A new method of constructing —. II. Correspondence theorem and basis operators - Kim **106A** (1981) 521
Symmetry breaking in Bernoulli systems (see *Bernoulli dynamical systems*) **104A** (1980) 359
Systems of coupled oscillators (see *Systems of point particles in equilibrium*) **110A** (1982) 302
Systems of point particles in equilibrium
– On the mean field description of — - Maćkowiak **110A** (1982) 302
Systems far from equilibrium
– On the theory of fluctuations around non-equilibrium steady states. A generalized time-convolutionless projector formalism - Tokuyama **102A** (1980) 399

Temperature-induced metamagnets (see *Metamagnets*) **103A** (1980) 257
Test particle problems
– Stochastic equations arising from —. I. Kinetic equations in the weak-coupling approximation - Kagermann **105A** (1981) 365
– Stochastic equations arising from —. II. Application to the harmonic lattice and the electron plasma - Kagermann **105A** (1981) 380
Tetracritical behaviour (see *Superconducting and ferromagnetic orderings*) **108A** (1981) 459
Thermal conductivity
– On the Senftleben–Beenakker effect on the — - Thijsse et al. **102A** (1980) 281
Thermal conductivity
– The — of mixtures of nitrogen with four noble gases at room temperature - Fleeter et al. **108A** (1981) 371
Thermal conductivity (see *Ammonia*) **102A** (1980) 305
Thermal conductivity (see *CH_3CN–Ar mixture*) **102A** (1980) 298
Thermal conductivity (see also *Senftleben–Beenakker effects*) **103A** (1980) 379
– The — of three polyatomic gases and air at 27.5°C and pressures up to 36 MPa - Fleeter et al. **103A** (1980) 521
Thermal conductivity (see *Square-well fluid*) **107A** (1981) 158
Thermal conductivity (see *Square-well fluid*) **107A** (1981) 299
Thermal conductivity (see *Supercooled liquid*) **101A** (1980) 477
Thermal convection, sensitivity of
– Sensitivity of nonequilibrium systems - Kondepudi and Prigogine **107A** (1981) 1
Thermal de Broglie wavelength (see *Pressure inequalities in quantum statistics*) ... **106A** (1981) 603
Thermal diffusion factors
– — at 300 K for seven binary noble gas systems containing helium or neon - Trengove et al. **108A** (1981) 488
– The pressure dependences of the — of the systems He–Ar, He–CO_2 and He–SF_6 at 300 K - Trengove et al. **108A** (1981) 502
Thermal fluctuations
– Contracted description of fluctuating systems - Felderhof and Jones **102A** (1980) 179
Thermal fluctuations
– On the fast and the slow components of — - Jou et al. **109A** (1981) 208
Thermal fluctuations (see *Fluctuation–dissipation theorem, generalized*) **106A** (1981) 443
Thermalization of beams of charged particles
– Fokker–Planck equation for the description of the thermalization of beams of energetic charged particles channeled through crystals - Fedyanin et al. **109A** (1981) 305
Thermal kinks
– On life time and mobility of thermal sine–Gordon kinks - Wonneberger **108A** (1981) 257
Thermal soliton generation
– On the rate theory for — - Wonneberger **103A** (1980) 543
Thermodynamic behaviour (see *Collective atomic system*) **101A** (1980) 599
Thermodynamic fluctuations
– — theory for shear flow - Evans and Hanley **108A** (1981) 567
Thermodynamic perturbation theory
– Constant-density — for quantum fluids - Kumar and Chandra **110A** (1982) 565
Thermodynamic potentials (see *Band Jahn–Teller systems*) **110A** (1982) 373
Thermodynamic properties (see *Ising model, on the square lattice*) **107A** (1981) 609
Thermodynamic properties (see *Magnetic alloys, dilute*) **104A** (1980) 309
Theta-function transformation, two-dimensional (see *Coulomb systems, two-*

dimensional) **109A** (1981) 237
Three-level atom (see *Photon density–density correlations*) **105A** (1981) 203
Three-level atoms (see *Cooperative two-photon resonance fluorescence*) **102A** (1980) 431
Three-level atoms (see *Excitation spectrum*) **110A** (1982) 431
Three-liquid-phase coexistence (see *Equilibrium of three liquid phases*) **103A** (1980) 140
Three magnon bound state equation
– The physical solution of the — in one dimension - Banerjee and Majumdar **107A** (1981) 212
Three-point cluster calculations (see *Cluster-variation method*) **109A** (1981) 445
Tight binding electron model (see *Linear chain, disordered*) **102A** (1980) 370
Time-convolutionless projector method
– Statistical–dynamical theory of nonlinear stochastic processes. II. — in non-equilibrium open systems - Tokuyama **109A** (1981) 128
Time correlation functions
– A mode coupling theory of higher order — - Ronis **107A** (1981) 25
Time correlation functions
– Quantum-kinetic equations for — in higher-order perturbation theory - Leermakers and Suttorp **108A** (1981) 333
Time correlation functions (see *Duffing nonlinear oscillator*) **104A** (1980) 495
Time-dependent potential (see *Fokker–Planck equation, nonlinear*) **108A** (1981) 233
Transformation theory in thermodynamics
– On the shape of the coexistence curve and of the critical isotherm in a density–density plane - Mistura **104A** (1980) 181
Transient behavior of laser radiation (see *Laser radiation, WKB treatment*) **107A** (1981) 71
Transitions, first order (see *Schofield's linear model*) **105A** (1981) 53
Transition temperature (see *Ising antiferromagnet, triangular*) **108A** (1981) 531
Transition temperature (see *Lattices, two-dimensional decorated*) **110A** (1982) 339
Transition temperature (see *Random bond Ising model*) **104A** (1980) 115
Transition time statistics (see *Chemical systems, bi-stable*) **101A** (1980) 535
Transmission coefficient (see *Crystalline slab with complex polarisability*) **107A** (1981) 471
Transport coefficients
– On the equivalence of convergent kinetic equations for hot dilute plasmas. I. — in first Chapman–Cowling approximation - Cohen and Suttorp **110A** (1982) 81
Transport properties (see *Knudsen gas, molecular*) **104A** (1980) 95
Transport properties (see *Square-well fluid*) **101A** (1980) 156
Transport properties (see *Square-well fluid*) **107A** (1981) 158
Transport properties in nonideal gases (see *Quantum kinetic equations*) **109A** (1981) 517
Transport relaxation equations (see *Fokker–Planck equation*) **105A** (1981) 271
Transport relaxation equations (see *Kinetic theory*) **102A** (1980) 344
Transport theory
– Multiple band electron–phonon —. I. Generating functional approach and generalized response - Kragler **102A** (1980) 22
Transport theory (see *Electron–phonon system*) **102A** (1980) 201
Tricritical exponents (see *Tricritical point*) **103A** (1980) 140
Tricritical point
– The equilibrium of three liquid phases upon approach to the — in water–acetonitrile–benzene–n-hexane mixtures - Bocko **103A** (1980) 140
Two- and three-spin interactions (see *Phase transitions, second-order*) **109A** (1981) 541
Two-dimensional bandstructure
– A relativistic Green matrix method to calculate the surface states in a

three-dimensional crystal slab - Dhoore and Phariseau **101A** (1980) 49
Two-dimensional Coulomb gas
– Equilibrium properties and the phase transition of the — - Høye and Olaussen .. **104A** (1980) 447
Two-dimensional electron gas
– Wigner function of a — in a magnetic field - Ioriatti and Isihara **102A** (1980) 532
Two-dimensional electron gas
– Application of a dielectric function to the exchange energy and specific heat of a — - Isihara and Ioriatti Jr. **103A** (1980) 621
Two-dimensional lattice (see *Anisotropic Heisenberg exchange*) **105A** (1981) 493
Two-level atoms (see *Collective atomic system*) **101A** (1980) 599
Two-level atoms (see *Two-photon absorption, double-beam*) **107A** (1981) 509
Two-level open systems
– Kinetic theory of resonance and relaxation in spin systems. I. Kinetic equations for — - Luczka **101A** (1980) 552
Two-level system interacting with EM field
– Approach to equilibrium of a — - Henin **108A** (1981) 305
Two-oscillator model (see *Crystalline slab with complex polarisability*) **107A** (1981) 471
Two-particle cluster calculation (see *Chemical spinodal*) **107A** (1981) 622
Two-particle relaxation (see *One-dimensional Ising chain kinetics*) **101A** (1980) 127
Two-photon absorption, double-beam
– Quantum statistics of field after double-beam two-photon absorption - Carusotto **107A** (1981) 509
Two-photon resonance fluorescence
– Quantum beats in — - Mavroyannis **102A** (1980) 193
Two-sublattice spin model
– Theory of collinear metamagnetism. I. Unified treatment of field- and temperature-induced metamagnets - Onyszkiewicz **103A** (1980) 226
– Theory of collinear metamagnetism. II. High density expansion method - Onyszkiewicz **103A** (1980) 257
– Theory of collinear metamagnetism. III. Magnons spectrum by renormalized high density expansion - Onyszkiewicz **103A** (1980) 274

Unitary transformations (see *Weyl images*) **109A** (1981) 317
Ursell functions (see *Perturbation theory for quantum fluids*) **104A** (1980) 339

Van der Pol oscillator (see *Self-sustained oscillations*) **104A** (1980) 378
Van der Waals equation of state (see *One-fluid theory*) **109A** (1981) 265
Van der Waals–Ising model (see *Renormalization transformations*) **108A** (1981) 211
Van der Waals model
– Reexamination of — for soft-core molecules - Ree **104A** (1980) 197
Vapour–liquid equilibria
– Vapour–liquid and gas–gas equilibria in simple systems. V. The system neon–xenon - Deerenberg et al. **101A** (1980) 459
Vapour–liquid equilibria
– Vapour–liquid and gas–gas equilibria in simple systems. VI. The critical exponents β_P and β_T of the system neon–xenon - Deerenberg et al. **103A** (1980) 183
Variational principle
– The variational theory and rate equation method with applications to relaxation near the instability point - Suzuki et al. **105A** (1981) 631

Variational principle for Ising models
– Variational principle for regular and random Ising models on the cactus tree or on the usual lattice in the "cactus approximation" - Morita **105A** (1981) 620
Variational principles (see *Fluctuation–dissipation relations, nonlinear*) **106A** (1981) 480
Variational principles (see *Fluctuation–dissipation theorem, generalized*) **106A** (1981) 443
Vectorial internal variables
– On — and dielectric and magnetic relaxation phenomena - Kluitenberg **109A** (1981) 91
Velocity autocorrelation function (see *Brownian particles, strongly interacting*) **110A** (1982) 606
Velocity autocorrelation function (see *Diffusion of spherical polymer*) **101A** (1980) 389
Velocity autocorrelation function (see *Oseen theory, generalized*) **108A** (1981) 417
Velocity autocorrelation function of a Brownian particle (see *Brownian particle in a plasma*) **105A** (1981) 337
Velocity autocorrelations
– — in a simple model - Grassberger **103A** (1980) 558
Velocity correlation-functions, multi-point
– Statistics of nonlinear dispersive waves. II. Multi-point velocity correlation-functions - Matsuno **104A** (1980) 71
Velocity distribution function of heavy ions (see *Kihara distribution*) **101A** (1980) 491
VH light scattering
– Hydrodynamic equations and — from viscoelastic (solid-like and fluid-like) systems, Phenomenological approach - Aizenbud and Gershon **107A** (1981) 126
VH light scattering
– Hydrodynamic equations and — from viscoelastic (solid like) systems. II. Molecular approach - Aizenbud and Gershon **108A** (1981) 583
Vibrational relaxation processes (see *Relaxation processes*) **101A** (1980) 67
Vibronic states (see *Jahn–Teller effects in crystals*) **110A** (1982) 451
Virial coefficients (see *Burnett experiment*) **105A** (1981) 536
Virial coefficient, second (see *Vapour–liquid equilibria*) **101A** (1980) 459
Viscoelastic (solid like) systems (see *VH light scattering*) **108A** (1981) 583
Viscoelastic systems
– Hydrodynamic equations and VH light scattering from — (solid-like and fluid-like). Phenomenological approach - Aizenbud and Gershon **107A** (1981) 126
Viscosity
– Measurements of the — of compressed gaseous and liquid methane - Diller **104A** (1980) 417
Viscosity (see *Ammonia*) **102A** (1980) 305
Viscosity (see *Fluid under shear*) **103A** (1980) 343
Viscosity (see *Neon–helium mixtures*) **106A** (1981) 415
Viscosity (see *Senftleben–Beenakker effects*) **103A** (1980) 379
Viscosity (see *Square-well fluid*) **101A** (1980) 156
Viscosity (see *Square-well fluid*) **107A** (1981) 158
Viscosity (see *Square-well fluid*) **107A** (1981) 299
Viscosity (see *Supercooled liquid*) **101A** (1980) 477
Viscosity (see *Thermal conductivity*) **103A** (1980) 521
Viscosity (see *Transport coefficients*) **110A** (1982) 81
Viscosity coefficient (see *Square-well fluid*) **104A** (1980) 243
Viscosity of colloidal systems, longitudinal (see *Brownian particles, interacting*) **107A** (1981) 190

Viscous drop, almost spherical
– A generalization of Faxén's theorem to nonsteady motion of an almost spherical drop in an arbitrary flow of a compressible fluid - Kaneda **101A** (1980) 407
– Brownian motion of an almost spherical drop of viscous fluid and fluctuating hydrodynamics - Kaneda **101A** (1980) 423
Viscous fluid
– On the motion and Brownian motion of *n* spheres in a — - Mazur **110A** (1982) 128
Viscous fluid (see *Friction coefficient, translational*) **108A** (1981) 598
Volume viscosity (see *Neutrino gas, massive*) **110A** (1982) 222
Vortex pairs (see *Planar rotator model*) **102A** (1980) 255
Vortices, microscopic theory of
– A microscopic theory of vortices in superfluid helium - Ichiyanagi **107A** (1981) 371

Waldmann–Snider equation (see *Boltzmann equations, classical and quantum-mechanical*) **108A** (1981) 265
Waldmann–Snider equation (see *Kinetic theory*) **102A** (1980) 281
Wannier excitons (see *Radiative decay of Wannier excitons*) **102A** (1980) 131
Water (see *Phase diagram of water*) **109A** (1981) 365
Water–acetonitrile–benzene–n-hexane mixtures
– The equilibrium of three liquid phases upon approach to the tricritical point in — - Bocko **103A** (1980) 140
Wave propagation (see *Radiation transfer theory*) **106A** (1981) 398
Weak interaction (see *Neutrino gas, massive*) **110A** (1982) 222
Weiss–Ising model, quantum-mechanical
– Effective dynamics of the quantum-mechanical Weiss–Ising model - Rieckers .. **108A** (1981) 107
Weyl's association (see *Affine geometry*) **102A** (1980) 236
Weyl images
– On the Weyl association of infinitesimal unitary and canonical transformations - Balazs **109A** (1981) 317
Wigner crystallization
– Magnetic properties of a nearly classical one-component plasma in three or two dimensions - Alastuey and Jancovici **102A** (1980) 327
Wigner distribution function (see *Bloch electrons in uniform fields*) **107A** (1981) 587
Wigner function (see *Affine geometry*) **102A** (1980) 236
Wigner function (see *Two-dimensional electron gas*) **102A** (1980) 532
Wigner function, semi-classical
– Pure state condition for the semi-classical Wigner function - Ozorio de Almeida **110A** (1982) 501
Wigner function, smoothed
– Some properties of the smoothed Wigner function - Soto and Claverie **109A** (1981) 193
Wigner representation (see *Quantum friction*) **102A** (1980) 561
WKB-type expansion (see *Langevin equations*) **101A** (1980) 301
WKB-type expansion (see *Langevin equations*) **108A** (1981) 221
Wreath groups
– — - Litvin **101A** (1980) 339

Xenon–deuterium mixture (see *Diffusion, Lorentzian*) **105A** (1981) 257
Xenon dioxide (see *Critical region of fluids*) **103A** (1980) 455

Xenon fluorides
– On the electronic structure of the — - Scheire et al. **101A** (1980) 22
Xenon–HD mixture (see *Diffusion, Lorentzian*) **105A** (1981) 264
Xenon–hydrogen mixture (see *Diffusion, Lorentzian*) **105A** (1981) 245
XY-chain, semi-infinite
– Local magnetization of the semi-infinite *XY*-chain - Bariev **103A** (1980) 363

Yang–Lee zeros (see *Linear chain, classical*) **108A** (1981) 169
Yvon–Born–Green equation in critical region
– Fourier space analysis of the — - Fishman **109A** (1981) 382

Zeuer model
– On coexistence of superconductivity and ferromagnetism - Bogolubov Jr. et al. **101A** (1980) 613
Z(M) models
– Statistical mechanics of — on Cayley trees - Moraal **105A** (1981) 472

Proceedings of the XIVth International Conference on Thermodynamics and Statistical Mechanics – STATPHYS 14
17–22 August, 1980, University of Alberta, Edmonton, Canada

[PHYSICA 106A Nos. 1 + 2]

ANNNI models (anti-ferromagnetic next-nearest-neighbour Ising) 28
Anderson model, of disordered conductor 175
Anderson localization, of electrons in disordered solids 326
Ashkin–Teller model 301
Ashkin–Teller model, in two dimensions 110
Autocorrelation function (velocity) 77

Black holes, thermodynamics of 204
Bloch equation 290
Boltzmann equation 70, 77, 278
Boltzmann Medal 17
Burnett equation 77

Charge conduction 189
Charge-ordering 189
Charge oscillations 189
Chemical oscillators, rhythms and turbulence in populations of 128
Corner transfer matrices 18
Corrections to scaling 48
Correlation functions 77
Correlation functions (spin) 28
Couette flow 77, 123
Coulomb liquids 189
Covariant equation of state 204
Critical exponents 48
Critical exponents, for gelation 177
Cubic model, n-state 110

Debye screening 189
Debye–Huckel theory of electrolytes 189
Desorption time 144
Dielectric constant 189
Disordered systems (electrons in solids) 326
Dynamical structure factor 77

Eight-vertex model 17, 292, 301
Eight-vertex model, and Potts model 110
Electrolytes 189
Entropy production 204

F-model (modified) 292
Fluctuation–dissipation theorem (static) 189
Fokker–Planck equation 128
Frustration, in spin glasses 344

Gauge invariance 159
Gaussian model 122
Gelation 177
Green–Kubo formula 189, 278

Hard–hexagon model 18
Hard–sphere gas 70
Heat flow, speed of 204
Helium 290
Helium (adsorption on constantan, graphite, argon and LiF) 144
Helium (solidification and melting of ^{4}He) 215
Helium, surface of liquid 102
Hexatic phase 102, 108, 226
Hopf bifurcation 128
Hydrodynamic equations 77
Hydrodynamic modes 77
Hydrogen bond 260
Hyperscaling 48

Interface, liquid–vapour 239
Interfacial profile 239
Instabilities, in Couette flow 123
Irreversibility 70
Ising model(s) 18, 28, 48, 292
Ising model, on a triangular lattice 301
Isochron 128
Isothermal compressibility 239

Kinetic theory 77
Kinetic theory, of quantum gas 278
Kubo formula 175

Landau–Placzek formula 189
Lattice-gas, Potts model 110
Lattice gauge theories 159
Lennard-Jones Devonshire cell model, in two

dimensions 226
Lennard-Jones fluid and solid, in two dimensions 226
Lennard-Jones 6–12 potential 226
Limit-cycles 128
Liquid crystal films 108
Liquid metals 189

Melting in two dimensions 108, 226
Melting, of helium 215
Memory function 189
Molecular dynamics, of water 260
Monte-Carlo calculations 226
Monte-Carlo method 159, 189
Monte-Carlo simulation 311
MOS (metal oxide semiconductor) 290

Neutron scattering 77
Non-equilibrium statistical mechanics, of physisorption 144
Non-linear susceptibility, in spin glasses 344

One-dimensional disordered conductors 175
Order parameter, in spin glasses 344
Oscillatory chemical reactions 128

Partition function, in lattice gauge theories 159
Percolation 260
Percolation theory 177
Phase diagram, for two-dimensional Lennard-Jones fluid and solid 226
Phase transitions, in lattice gauge systems 159
Phase transitions, in two-dimensional models 122
Phonon mediated adsorption 144
Physiological clocks 128
Physisorption 226
Physisorption, kinetics of 144
Plane-rotator model 311
Plasma (one component) 189
Plasma, classical one component 102, 290
Plasma, electrical conductivity of 189
Plasma physics 189
Potts model 301
Potts model, in two dimensions 110

Quadrupole moment, of water 239
Quasi-long-range order 311

Rayleigh–Bénard convection cells 108
Relativistic statistical mechanics 204
Relativistic thermodynamics 204
Renormalization, exact differential real-space??
Renormalization group 59, 311
Renormalization group (Anderson localization) 326
Renormalization group, for Potts and cubic models 110
Reynolds number 123
Roughening transition 28

Sol–gel transition 177
Spin glasses 344
Spin systems, exact renormalization of 301
Structure factor (static) 189
Supercooling, of water 260
Surface magnetization 28
Surface tension 239

Temperature of a moving body 204
Thermodynamic limit 59
Time correlation functions 77
Transport coefficients 77
Tricritical points and exponents 110
Triple-collision operator 278
Turbulence, in Couette flow 123
Turbulence in populations of chemical oscillators 128
Two-dimensional crystal of electrons 102
Two-dimensional Lennard-Jones fluid and solid 226
Two-dimensional melting 108
Two-dimensional statistical mechanical models 122

Universality 159
Universality, of amplitudes 48

Virial coefficients, for Lennard-Jones 6–12 potential, in 2D 226
Virial expansions of transport coefficients 77
Vlasov equation 70
Vortex flow, Taylor 123
Vortex flow, wavy 123
Vortices 311

Water, interfacial properties of liquid 239
Water, liquid water and percolation theory 260
Wigner crystal, in 2 dimensions 102
Wigner crystallization 290
Wigner distribution function 290

NOTE TO AUTHORS

PHYSICA is published in four sections:

PHYSICA A *(Theoretical physics – Statistica physics)* contains papers on theoretical physics, with emphasis on statistical mechanics. Papers on experimental work on the statistical or collective behaviour of matter in the gaseous and liquid states also belong to this section. Theoretical physics is to be understood as the study of the theory itself and not as the interpretation of specific experimental results.

PHYSICA B *(Physics of condensed matter)* contains papers, both experimental and theoretical, in the realm of the physics of condensed matter. Articles on solid state physics and low temperature physics, e.g. superconductivity and properties of liquid and solid helium, should be submitted to this section.

PHYSICA C *(Atomic and molecular physics – Plasma physics – Optics)* contains papers dealing with free atoms, ions and molecules, with radiation, with the internal structure of atoms and molecules (spectroscopy in all wavelength regions except the gamma radiation region; collision physics), and with their interactions.

PHYSICA D *(Nonlinear phenomena)* contains papers and review articles reporting experiments, techniques and ideas which, although they may be derived and explained in the context of a particular field, advance the understanding of nonlinear phenomena in general. Contributions of this type in the recent literature have dealt with: wave motion in physical, chemical and biological systems; chaotic motion in models relevant to turbulence; quantum and statistical mechanics governed by nonlinear field equations; instability, bifurcation, pattern formation and cooperative phenomena.

PHYSICA A

Submission. Manuscripts should be sent in *duplicate* to the editor Professor Dr. H.W. Capel, Instituut-Lorentz, Nieuwsteeg 18, 2311 SB Leiden, The Netherlands.

Submission of a paper will be taken to imply that it represents original work not previously published, that it is not being considered elsewhere for publication, and that if accepted for publication it will not be published elsewhere in the same form, in any language without the consent of the editor.

The master copy and original drawings will be returned to the authors in case their paper is not accepted for publication.

Manuscripts should be written in English, French or German and typed with double spacing, wide margins and on one side of the page only.

The *title* should be concise and specific. When the length of the title exceeds 45 letters, a *running title* should be indicated. The name and address of the institute where the research was carried out should be stated with each author's name.

An *abstract* of not more than 150 worlds should be provided in English, summarizing the new information and the author's conclusions.

Keywords (five or less) should be provided for the subject index, and if possible the appropriate PACS classification codes.

References in the text should be numbered (e.g., "Jones and Smith[1]) have reported that...") and listed on a separate sheet stating the author, journal, volume and the year of publication (in brackets) and the number of the first page. Example. 1) S. Jones and P. Smith, Phys. Rev. **190** (1964) 2016.

Formulae should be clearly written. Vectors will be printed in bold-face italics (heavy, slanting type), and should be indicated by a wavy underlying in the type-script.

Special attention should be paid to characters that can be easily misread, such as i (lower case), I (cap.), l (el), 1 (one), ′ (prime); o (lower case), O (cap.), 0 (zero), ° (degree); u, v (vee), ν (Greek nu), V (cap.); ×, x, X; z, Z; p, P, ρ (Greek rho); etc.

Drawings and any *lettering* should be done in Indian ink. Lines should be bold, the frame lines of graphs slightly finer than those of the plotted curves. The figures should be numbered and the captions listed on a separate sheet.

Alterations in the text cannot be permitted once the paper has been typeset. Authors will be charged for extra correction resulting from their inattention.

Refereeing. All papers are subjected to refereeing, and in case a paper cannot be accepted in the form it was submitted, the submitting author will be informed about the referee's comments.

Acceptance. Acceptance forms will be sent by the editor. There is *no* page charge. Upon acceptance of an article, author(s) resident in the USA will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the U.S. Copyright Law.

Reprints. 50 reprints of each article will be supplied to the first author free of charge. An order form for reprints will be provided with the author's proof. It should be returned to the publishers together with the manuscript and one corrected copy of the author's proof.

Analysis, Manifolds and Physics

Revised Edition

by **YVONNE CHOQUET-BRUHAT, CECILE DEWITT-MORETTE with MARGARET DILLARD-BLEICK**

1982. xx + 630 pages. Price: US $29.50/Dfl. 75.00
ISBN 0-444-86017-7

COMMENTS ON THE FIRST EDITION:

"...This book belongs on the shelf of every mathematically inclined physicist and every mathematician who is interested in physics..."

Barry Simon

"...The scope of the coverage is unusually wide and the material treated with more rigour than is customary in a mathematical physics text, because only then can results be used correctly and fruitfully..."

Physikalische

CONTENTS: *Chapters:* I. Review of Fundamental N Analysis. II. Differential Caluclus on Banach Spac Differentiable Manifolds, Finite Dimensional Case. Integration on Manifolds. V. Riemannian Manifolds Kählerian Manifolds. V bis. Connections on a Princ Fibre Bundle. VI. Distributions. VII. Differentiable M Infinite Dimensional Case. References. Index.

SELECTED STUDIES: Physics-Astrophys Mathematics, History of Science

A Volume Dedicated to the Memory of **Albert Einstein**

edited by **THEMISTOCLES M. RASSIAS** *and* **GEORGE M. RASSIAS**

1982. xii + 392 pages. Price: US $90.75/Dfl. 195.00.
ISBN 0-444-86161-0.

This important volume consists of submitted works written by eminent scientists from the international community on the occasion of the centenary of Albert Einstein's birth (1879-1979). The work provides an insight and analysis on various research problems in the fields of physics, astrophysics, mathematics and the history of science. It also provides the opportunity for publication of new aspects of scientific problems related to Einstein's discoveries, as well as a deeper understanding of the humanistic ideals that inspired him both as a man and as a scientist.

Solitons and Instantons

An Introduction to Solitons and Instantons in Quantum Field Theory

by **R. RAJARAMAN**

1982. xii + 392 pages. Price: US $90.75/Dfl. 195.00.
ISBN 0-444-86229-3.

The presentation of this work is kept at a fairly simple level, and ideas are developed through illustrative examples. Techniques not covered in older field theory textbooks, such as functional integral methods, are presented in some detail to the necessary extent.

CONTENTS: Chapters: 1. Preface cum Introduction. 2. Classical Solitons and Solitary Waves. 3. Monopoles and Such. 4. Classical Instanton Solutions. 5. Quantisation of Static Solutions. 6. Functional Integrals and the WKB Method. 7. Some Exact Results. 8. Collective Coordinates and Canonical Methods. 9. Semiclassical Methods for Fermi Fields. 10. Instantons in Quantum Theory. 11. Some More Instanton Effects. Appendices. References. Index.

Spectral Transform and Solitons:

Tools to Solve and Investigate Nonlinear Evolution Equations. Volume one

by **FRANCESCO CALOGERO** *and* **ANTONIO DEGASPERIS**

STUDIES IN MATHEMATICS AND ITS APPLICATIONS, Vol. 13

1982. xviii + 514 pages. Price: US $111.50/Dfl. 240.00.
ISBN 0-444-86368-0

This volume focusses on one approach, and leaves out any specific treatment of applications. The guiding thread is the analogy of the spectral transform technique for solving nonlinear evolution equations to the Fourier transform method for solving linear PDEs.

CONTENTS: Preface. Foreword. Introduction. *Chapters:* **1.** The Main Idea and Results: An Overview. **2.** The Schroedinger Spectral Problem on the Line. **3.** Nonlinear Evolution Equations Solvable by the (Schroedinger) Spectral Transform. **4.** Bäcklund Transformations and Related Results. **5.** Conservation Laws. **6.** Extensions. Appendices. References. Subject Index.
